Abo-Shally Hasan

Co-Founder & Entrepreneur
Hasoub

Hasan is an impact-driven multidisciplinary; social-entrepreneur, experience-designer, and technologist. He self-learned software development at a young age, sold his first application while in high-school and worked for several tech startups. In 2014 Hasan founded "Hasoub" - a grassroots NGO fostering tech-entrepreneurship as an economic lever for the local Arab society and working towards creating more diverse innovation within a more inclusive "Startup Nation". And in 2016 he founded "Ibtekar" - a socio-educational venture promoting making and technological-innovation among kids and youth from underprivileged backgrounds.

Hasan is a Forbes Under 30 honoree (2017), Stanford's AMENDS fellow, TEDx speaker, OneYoungWorld ambassador and the youngest among TheMarker's 2018 list of "40 Under 40" promising youth in Israel.

Hasan has a degree in interactive media from IDC-Herzliya (with full scholarship) and served in the research team of its Media Innovation Lab (miLAB). Currently, he leads the strategy and innovation at Hasoub, pursues an MBA within the Technion's Startup-MBA program and recently joined Microsoft as a product manage intern.

Admon Uri

Founder, CEO
Captain Up

Engagement and Retention platform, powered by machine learning and behavioral economics.
The platform creates loyalty and increases user engagement, using gamification, communication modules, social tools and insights.
Instructor, Tel Aviv University - MBA - Technology, Entrepreneurship and Innovation program.
Board member, game.is : the digital games association in Israel.

Aharon Aharon

CEO
Israel Innovation Authority

Aharon Aharon is the CEO of the Israel Innovation Authority, an independent public entity that operates for the benefit of the Israeli innovation ecosystem and Israeli economy as a whole. Its role is to nurture and develop Israeli innovation resources, while creating and strengthening the infrastructure and framework needed to support the entire knowledge industry.

Prior to his role at the Authority, Aharon served as the VP of Hardware Technologies and General Manager of Apple Israel. Aharon joined Apple in 2011, as its first Apple employee in Israel, and managed the R&D activities of Apple's Hardware Technologies in Israel. In 2004, Aharon co-founded Camero, a startup company developing through-the-wall micro-power radars for the defense and HLS markets. He served as the CEO and Chairman of the company, which was acquired by the SK group in 2010.

From 2003 till 2010, Aharon served as an active Chairman of the Board at Discretix, a startup company providing solutions for data security in mobile phones and hand-held devices. Discretix was acquired by ARM in 2014.

Aharon managed Seabridge, a wholly owned subsidiary of Siemens.

As CEO, he oversaw the successful turnaround of the company.

Aharon served as COO of Zoran (NASDAQ: ZRAN) in Silicon Valley, managing all aspects of company activities along with the financing of development of chips for consumer electronics markets.

Aharon began his professional career at the IBM Research Division in Haifa, Israel, where he spent 14 years and held a number of senior management positions including Deputy Manager of IBM Research's Haifa operations.

Aharon holds a B.Sc and M.Sc in Computer Engineering and Electrical Engineering respectively from the Technion, where he lectured for more than 15 years (1983-1999).

Aharoni Ido

Place Branding Specialist
Professor of International Relations,
New York University

Ambassador Ido Aharoni serves as a global distinguished professor at New York University's Program of International Relations in the Faculty of Arts and Science. He is a guest lecturer at Florida Atlantic University in Boca Raton and at the University of Haifa in Israel. Since 2016 he serves on the International Advisory Council of APCO-Worldwide, one of the largest strategic communications firms in the world. He is the founder of Emerson Rigby, a full-service positioning consultancy, and a Global Ambassador for Genius 100 visions inspired by Albert Einstein. In 2018 he was appointed as Global Ambassador for Maccabi World Union, one of the largest sporting networks in the world.

Ambassador Aharoni is a 25-year veteran of Israel's Foreign service, a public diplomacy specialist, founder of the Brand Israel program and a well-known nation branding practitioner.

Ambassador Aharoni has been Israel's longest serving consul-general in New York to date. He held that position for six years (2010-2016) and oversaw the operations of Israel's largest diplomatic mission worldwide. He was a member of Israel's Foreign Service from 1991 until 2016 and held two other overseas positions in Los Angeles and in New York.

Avidan Meir

Vice President Business
Development International
Cellebrite

Today Meir leads the business development in our tier one accounts, providing technological solutions and services to the Law Enforcement & Intelligence entities as part of building Digital Intelligence capabilities.

In my previous position I was the Director of the National Preparedness Center at Israel's National Cyber Directorate (INCD). I developed, promoted and implemented a national concept for cyber crisis preparedness as a framework to enhance cooperation and discussions at a national level.

In addition, I lead team of experts in various cyber disciplines, for the sake of implementing solutions such topics include: risk management, incident responses, crisis management and recovery, operational continuity and cyber exercises, both on the national level and at private market.

Prior to joining the INCD I worked nearly 20 years in various defense entities both governmental and private as part of senior management positions and managed a large team of officials and experts in Information and cyber security, as part a local and international program.

I was also a defense Attaché in India, where I led and initiated connections between Israel and India's Ministries of Defense, Governmental Agencies and industries.

I have promoted strong relations between both countries, and opened doors and hearts for joined projects.

I hold a B.A. in Political Science and a M.A. in National Security, both from Tel-Aviv University.

Avraham Barak

CEO
From Survival to Leadership

Barak Avraham was born in Ethiopia. When he was 9 years old he made Aliyah, moved to Israel with his mother and siblings, as part of Operation Solomon in 1991.

Chen Pearly

Vice President
HTC

Pearly Chen is a Vice President at HTC, a smartphone industry pioneer and virtual reality industry leader. She has served as Chief of Staff to its CEO and Chairwoman Cher Wang since 2013 as a cross-functional executive on strategic initiatives. She also manages HTC's \$100 million accelerator program since its inception in 2016, leading investments in a growing global portfolio of innovative startups in virtual and augmented reality, in addition to being part of the executive team at VIVEPORT, a hardware-agnostic VR content service provider. Prior to taking on the mission to improve lives through transformative technology, she was an investment professional at Goldman Sachs.

A dynamic, high energy global citizen, multi-linguist, voracious reader, avid traveler, competitive triathlete and mother of two, she believes that everyone has the capacity to create a legacy that contributes to humanity's continual progress. Putting to good use of her infectious positive energy and unique perspectives, she makes it her life's goal to inspire and support others to thrive with their fullest potential.

Cohen Rapha

CTO
Waze

As Head of Product for Waze, Rapha oversees the company's product vision and execution, which is fundamental to Waze reinventing itself as a Mobility company.

Parisian born and bred, Rapha moved to Israel to study Electrical Engineering at the Technion (Israel Institute of Technology), specializing in Digital Signal Processing and Information Theory.

After working for global companies as an Algorithms Engineer, he co-founded a company in the algo-trading space, where he served as a CTO. He then joined DesignArt Networks as Head of Product to build the first 4G base stations in the market. The company was acquired by Qualcomm in 2012 to lead its infrastructure strategy.

Following those two exits, Rapha went back to the corporate world and joined Google as a Product Manager in 2015—launching the new Google Sites (a B2B Sites Builder Tool, part of the GSuite). A year later he joined Waze as Product Lead for the newly-launched Waze Carpool, before moving into his current role leading all Waze Product efforts in 2018.

Rapha is the husband of one and the father of four, and currently lives in Israel's countryside amongst vineyards and palm trees.

Sir Cohen Ronald

Chairman of the Global Steering Group
for Impact Investment
The Portland Trust

Sir Ronald Cohen is a pioneering philanthropist, venture capitalist, private equity investor, and social innovator, who is driving forward the global Impact Revolution.

For nearly two decades, his ground-breaking initiatives have catalyzed global efforts to drive private capital to serve social and environmental good.

He serves as Chairman of the Global Steering Group for Impact Investment and The Portland Trust. He is a co-founder of Social Finance UK, USA, and Israel; and co-founder Chair of Bridges Fund Management and Big Society Capital.

He chaired the G8 Social Impact Investment Taskforce (2013-2015), the UK Social Investment Task Force (2000-2010) and the UK's Commission on Unclaimed Assets (2005-2007).

In 2012 he received the Rockefeller Foundation's Innovation Award for Social Finance.

He was a co-founder and Executive Chairman of Apax Partners Worldwide LLP (1972-2005), a global private equity firm. He was a co-founder and Chairman of the British Venture Capital Association and a co-founder of the European Venture Capital Association. He is a member of the Board of Dean's Advisors at Harvard Business School; a former director of the Harvard Management Company; and formerly a member of the Harvard University Board of Overseers and the University of Oxford Investment Committee.

He graduated from Oxford University, where he was President of the Oxford Union.

He holds an MBA from Harvard Business School to which he was awarded a Henry Fellowship.

Sir Ronald was born in Egypt and left as a refugee at the age of 11, when his family came to the UK.

Conze Max

CEO
ProSiebenSat.1 Media SE

“I love the things we at ProSiebenSat.1 do: entertainment, digital and commerce. It’s a business and industry in transformation and I believe we at ProSiebenSat.1 can lead that future. We have all to play for: one vision, one game plan, one team of over 6,500 passionate creators. ‘If not now – when? If not you – who?’ has been my motto for the past 15 years. It captures my fundamental belief that future needs creating now and that responsibility and leadership is absolute and personal. That what we do, we do full on with heart and mind and everything we have invested.”

Max Conze has been CEO of ProSiebenSat.1 Media SE since June 1, 2018. The company pursues a clear growth strategy that combines the power of its Entertainment brands with its strong Commerce platforms. By creating this unique business model, the objective is to make ProSiebenSat.1 a truly digital, diversified and fast-growing company.

From 2011 to 2017, Conze headed Dyson Ltd. as CEO. Underpinned by his core beliefs of relentless dissatisfaction with the status quo and customer centricity, he transformed Dyson into a global technology leader. During his leadership, Conze quadrupled revenues and earnings (£ 3.5bn revenues / £ 801m EBITDA in 2017) and grew the business from 2,500 employees to 10,000 across 70 countries.

From 1993 to 2010, Max Conze worked at Procter & Gamble in general management and marketing roles across Germany, Europe, US and China. From 2007 through 2010, he was responsible for the German, Austrian and Swiss Beauty & Grooming businesses as well as developing new global beauty categories. Conze studied Business Administration at the Columbus State University (Abbott Turner School of Business).

Max Conze was born in 1969 in Bielefeld. He enjoys spending his leisure time horse riding and alpine skiing with his two children.

Coppel Toby

Co-Founder & Partner
Mosaic Ventures

Toby Coppel is Co-founder and Partner at Mosaic Ventures, a London-based venture capital firm focused on early stage investing across Europe with \$300 million under management. Toby has been investing and operating in internet startups since 1996. He began his investment career at Allen & Company, before starting his first investment firm. He joined Yahoo!'s new management team in 2001 and spent 6 years as Yahoo!'s Chief Strategy Officer, leading over \$5 billion of investments and acquisitions including \$1 billion into Alibaba that was sold for over \$80 billion. Following that, both as an angel and alongside Richard Branson and Virgin, he made investments including Criteo, Pinterest, and Transferwise. At Mosaic, Toby is thematically focused on blockchain, machine intelligence, next-generation finance, digital health and marketplaces, and works closely with our portfolio companies Auterion, Blockchain, Centrifuge, habito, Tray.io, Veriff, and Vortexa. He is the Chair of eLife Sciences, a non-profit, open platform for scientific research. He is a graduate of Oxford University and Harvard University, and a Henry Crown Fellow at the Aspen Institute.

Czerny Steffi

Founder
DLD

Steffi Czerny is Managing Director of DLD Media and co-founder of DLD Conference as well as its global spin-offs like DLDwomen, DLD Tel Aviv, DLDcities, DLDnyc and DLDsummer.

Joining the Burda group in 1995, Steffi has held several executive positions in new media activities. Her background is in political sciences and communications. She has followed developments in the digital world for over 20 years and focuses on developing branding and communication initiatives.

Steffi was identified as number 30 of The 2015 Wired 100 and has also been chosen as one of the 50 most inspiring women in European tech in 2015 by inspiring50.com for her success in bringing the international digital elite together at DLD.

Furthermore she owns the state medal for special merits to the Bavarian economy (2014) and the “Europa-Medaille” for special merits to Bavaria in a united Europe (2015).

Dana David

Head of VC Investment
European Investment Fund

The European Investment Fund is the investment entity of the European Union; the European Investment Bank and the European Commission being its main shareholders. The EIF was launched in 1994 to support the access to finance of European SMEs through two lines of business: Guarantees and Equity Investments. It is the largest LP in the European Venture Capital market.

David is heading the VC ICT Team of the EIF, representing circa EUR 1bn of commitments per year, where he has been working for more than eight years. Previously, he has been in charge of the investments in VC funds in France, Israel, and of a specific mandate to support the diversification of the economy of Luxembourg. David was also overseeing EIF activities with Accelerators.

David has been investing in all the sectors covered by EIF investment programs, such as ICT, Life Sciences, and Cleantech. To date, David made 40+ commitments in VC funds (approx. EUR 2bn of commitments) from micro-seed strategies to growth financing. David is EIF's representative in a large number of funds across Europe and a regular speaker in industry conferences and tech events.

Prior to joining the EIF, David spent two years at PwC Corporate Finance where he was in charge of fundraising activities for start-ups and businesses valuations.

David started his career in the Private Equity department of Société Générale Asset Management in Paris for five years, where he was part of the VC fund-of-funds team.

David holds a Master Degree in Financial & Tax Engineering from ESCP-EAP Paris, a Master Degree in Portfolio Management from University Paris XII, and a Master Degree in Finance & Management from University Paris I La Sorbonne.

De Guillebon Pierre-Louis

CEO
Orange Events

Pierre-Louis de Guillebon, born in 1965, is the CEO of Orange Events and is in charge of Orange of Paris 2024 Olympic Games project.

As CEO of Orange Events, Pierre-Louis' role is to oversee telecom services needs for high-profile events (such as Tour de France, Roland Garros, G7, FWWC 2019...) and manage for Orange, the Olympic Games project Paris 2024.

Previously, he was the CEO of Orange International Carriers managing international connectivity and transmission services for Wholesale Voice, Mobile, Internet and Security services.

Since joining the Group in 1990, Pierre-Louis de Guillebon has held various posts of responsibility, both inside and outside France. Pierre-Louis brings significant experience of the international wholesale industry to his post of CEO of International Carriers, having worked previously in the field of international operators for Telmex in Mexico and on the foundation of optical fibre technology.

Pierre-Louis de Guillebon was with Orange Business Services where he was Managing Director of the Paris B2B sector. This involved overseeing the telecommunications needs of all Paris-based OBS customers, including voice, mobile and data services separately, as well as integrated solutions and professional services, for France-based companies.

Posts held formerly by Pierre-Louis de Guillebon within the Group, including COO and CEO of Etrali in the trading & finance services and Director of France Telecom Long Distance Marketing.

Pierre-Louis de Guillebon is a graduate of École Polytechnique as well as of Télécom Paris Tech and also holds a management degree from INSEAD.

De Vries Gilad

Senior Vice President of Strategy
Outbrain

Gilad is Senior Vice President of Strategy at Outbrain, managing business/product strategy, Corporate Development, M&A and the company's New Initiatives such as programmatic and Video. Before joining Outbrain, Gilad was VP of Digital Media and Principal at Viola Ventures, one of Israel's top tier venture capital firms, where he was highly engaged in Carmel's investments in digital media, Internet and mobile startups. Gilad holds a B.A. in economics and business management from Bar-Ilan University and a Global MBA cum laude from the IDC Herzelia.

Diederich Michael

CEO, Commercial Banking Germany -
UniCredit Bank AG

Michael Diederich joined Bayerische Vereinsbank AG (now UniCredit Bank AG) in 1996, after a three year experience in a consulting and auditing firm. He started as a Trainee in International Markets, worked in the equity capital markets syndicate and served as an Executive Assistant for the Corporate Customer Division until the end of 2000.

Following three years of work at Communication Equity Associates in Munich, he re-joined UniCredit Bank AG in 2003, holding various responsibilities in the Markets and Investment Banking Division. In 2009 Michael Diederich became a divisional board member of UniCredit Bank AG in the Corporate & Investment Banking Division, followed by the Unternehmer Bank Division. Here he headed the large corporate segment for the bank.

In September 2015, after a brief experience as CEO of Euler Hermes Kreditversicherung AG, he was appointed member of the Management Board of UniCredit Bank AG in charge of the Corporate & Investment Banking Division as well as member of the Executive Committee of CIB UniCredit S.p.A.

On January 1, 2018 he took over the role of Spokesman of the Management Board at UniCredit Bank AG and Country Chairman Germany at UniCredit S.p.A. As such he is member of UniCredit S.p.A.'s Executive Management Committee with the Group title of Senior Executive Vice President.

Domingo David

Head of Innovation Hub
Mobile World Capital Barcelona

David has more than 15 years of experience in project/technical management, entrepreneurship and curation in the fields of innovation, startups, audiovisual and digital culture.

Currently Head of Innovation Hub at Mobile World Capital Barcelona, he leads the design, creation or management of industry innovation ecosystems, creating long-term relationships to foster entrepreneurship and adoption of disruptive and digital innovations.

Prior to MWCB, David founded and worked for several startups and was knowledge manager and programme director of 4YFN worldwide events focused in startups, new technologies and investment.

David holds a computer science degree from BarcelonaTech University (UPC) and has his roots in the demoscene, open source, free music and other computer art subcultures.

Dor Dorit

Vice President of Products,
Check Point Software Technologies Ltd.

Dorit Dor serves as Vice President, Products for Check Point Software Technologies. She manages all product definition and development functions for both the enterprise and consumer divisions of the Company.

Dr. Dor's core responsibilities include leading the company's product management, research and development (R&D) and quality assurance (QA) initiatives from concept to delivery. She has been instrumental to the organization's growth and managed many successful product releases.

She has been published in several influential scientific journals for her research on graph decomposition, median selection and geometric pattern matching in d-dimensional space. In 1993, she won the Israel National Defense Prize. Dr. Dor holds a Ph.D. and M.S degree in computer science from Tel-Aviv University, in addition to graduating cum laude for her Bachelor of Science degree.

Dufour François

Director Startup Scouting & Promotion
Orange

After 20 years of experience in sales & marketing, François Dufour started working on open innovation inside Orange in 2010. In 2012 he launches Orange's Startup Program. In 2014 he launches Hello Startup, a TV show sponsored by Orange and broadcasted on BFMTV, the #1 TV news channel in France. François Dufour is now Startup Scouting Director at Orange. He is also the Operational Director of OrangeFab in Israel.

Duran Pere

Director
4YFN

Pere is the Event Series Director of 4 Years from Now, one of the most influential startup platforms in the world. He is an expert in startups, innovation and growth.

Pere is a Barcelona native who has worked with the MWC for over 10 years. He was the Sales Director of MWC sister-event 4 Years from Now (4YFN) and recently took over as 4YFN's Event Director. Pere studied Economics at the Pompeu Fabra University and lived in London for 3 years where he worked in telecoms and events.

Pere has been instrumental in the growth and development of 4 Years from Now from a small area within MWC attracting 2,000 attendees into a supersize startup event outgrowing its event location and bringing in 21,000 visitors including top investors and corporates. The event has grown to LA and Shanghai and has transformed for a one off event to world-famous innovation platform. 4YFN is building the startup ecosystem, with Pere at the helm.

Dusek Mirek

Head of Middle East and North Africa &
Member of the Executive Committee
World Economic Forum

Deputy Head for As Deputy of the Forum's President for Geopolitical and Regional Affairs, Mirek oversees diplomatic initiatives, humanitarian affairs, regional strategies and government engagement with the Centre for the Fourth Industrial Revolution. As Head of the Middle East and North Africa, he leads the Forum's strategy and manages the overall engagement with business, government and civil society leaders across the region. Mirek spearheads several publications including The Global Risk Report, The Arab World Competitiveness Report and The Future of Jobs and Skills in the Middle East. Mirek joined the Forum as Global Leadership Fellow in 2007.

Prior to that, Mirek worked on public diplomacy at the US Embassy in Baghdad and was the Director of the American Centre at the US Embassy in Prague. Mirek has an International Studies MA from University of Reading (UK) and a Political Science BA from Charles University (Prague). He speaks fluently Arabic and is a native Czech speaker.

Efrati Shai

Director
**Sagol Center for Hyperbaric Medicine
and Research**

Director of the Sagol Center for Hyperbaric Medicine and Research, Shamir (Assaf-Harofeh) Medical Center, Israel.
Director of Research & Development, Shamir (Assaf-Harofeh) Medical Center, Israel.
Professor at Sackler School of Medicine and the Sagol School of Neuroscience of Tel Aviv University.

Dr. Shai Efrati is a professor at Sackler School of Medicine and the Sagol School of Neuroscience of Tel Aviv University and the director of the Sagol center for hyperbaric medicine and research at Shamir (Assaf-Harofeh) Medical Center in Israel. The center, under Prof. Efrati management, has become one of the largest hyperbaric center worldwide, currently treating more than 200 patients per day. Prof. Efrati is also the director of Research & Development at the Medical center, affiliated to Tel-Aviv University. Taking the two passions/positions together Dr. Efrati has initiated a research program focusing on the neuroplasticity (regeneration of damage brain tissue) by the use of Hyperbaric Oxygen Therapy (HBOT). In the first clinical studies it was demonstrated that HBOT can induce neuroplasticity in post stroke and Traumatic Brain Injury even years after the acute Insult. The important clinical results gained from the research program have led to fruitful ongoing cooperation including multidiscipline team focusing on the regenerative effects of hyperbaric oxygen in age related functional decline and Alzheimer disease.

Farbman Zeev

Co-Founder & CEO
Lightricks

Zeev had planned on a career in academia, studying Computer Science for his Bachelor's, Master's and eventually his PhD at Hebrew University in Jerusalem. When he's not at the office, you can find Zeev scouting out the next best oyster or sushi joint and practicing Brazilian Jiu-Jitsu with co-founder, Nir.

Farhi Amir

Vice President Strategic Development
WalkMe

Amir Farhi, VP of Global Strategic Alliances & Business Development at WalkMe

Amir Farhi is the Vice President of Global Strategic Alliances & Business Development at WalkMe, the world's leading Digital Adoption Platform. Amir has more than 20 years of industry experience as a software developer, an executive, consultant and entrepreneur. Amir is a graduate of Tel-Aviv University (Computer Science & Management) and holds an MBA (Entrepreneurship) from Boston University.

Friedman Moshe

Head of Amdocs Ventures
Amdocs

Prior to running Amdocs Ventures, Moshe was an M&A “dealmaker” for Amdocs and was responsible for the acquisitions of Vubiquity, Vindicia, UXP and cVidya. Prior to Amdocs, Moshe was an investment banker with Deutsche Bank and Jefferies and graduated from Princeton University with High Honors.

Gerfer Alexander

CEO
Würth Elektronik Eisos

Alexander Gerfer is CEO and CTO of one of Europe's largest manufacturers of electronic and electromechanical components with around 8,300 employees, based in Waldenburg, Munich, Berlin and Barcelona, and with R&D locations in Silicon Valley, Dallas and Shenzhen. The graduate electrical engineer learned his business from scratch as a radio and television technician.

As a man of the first hour, he set up the product development as well as quality management. The passion of the author of specialist books is to communicate complex content understandable.

Gever Eyal

Contemporary Artist Passionate
About Technology

Eyal Gever is a contemporary artist whose work sits at the fusion of art and technology. Using just a palette of code, he develops life-like digital simulations of moments in time - often dramatic or catastrophic in nature from which he fabricates 3D-printed sculptures and light installations. Born in 1970 in Tel Aviv, Israel, attended Jerusalem's prestigious Bezalel Academy of Art and Design. Eyal has been working on the development of 3D technologies for nearly twenty years. Harnessing these expertise, Eyal's artworks are always characterized by the use of cutting-edge technologies to explore and examine issues surrounding innovation, ecology and global issues.

In 2016, his sculptures were exhibited as part of a Turner retrospective at the Rijksmuseum Twenthe alongside Gerhard Richter and JMW Turner. In 2017 Gever was commissioned by ZKM Museum of Contemporary Art to create large scale light installation for Karlsruhe Palace, and in 2018 Eyal collaborated with NASA and Made In Space Inc. to create #Laugh, the first art sculpture ever to be produced in space.

Goldberg Marc

CEO
Maslow Capital Partners

Marc Goldberg is the founding partner of Maslow Capital Partners a global growth merchant bank focus on the information industry.

Prior to founding Maslow, Marc was a founding member of the Reuters Greenhouse Fund and Occam Capital. He sold Occam Capital to Bryan Garnier & Co. to launch BGPI. Marc brings more than 20 years of investment experience in TMT Europe/USA with more than 50 transactions as principal and 50 transactions as advisor, as well as 15 years of IT operation background in Europe/USA as the former Chief Architect of Reuters

Marc is the executive producer and co-host of Kinnernet Europe an un-conference that brings every year 200 innovators to foster a global conversation on desirable futures. He completed a BS/MS Paris VI University, Post Graduate Stanford, IHEDN session 61. He is an avid explorer and long distance runner.

Globerman Dror

Journalist
TV Personality

Dror Globerman is a Journalist, TV Personality, public speaker and a musician. He hosts the TV documentary series "Anashim" at Keshet Broadcast. He is also senior technology journalist, and the founder and Editor-in-Chief at NEXTER.co.il, the leading tech media website in Israel.

Hadar Leora

Director of Europe Department 2
Foreign Trade Administration

Leora Hadar is the Director of the Europe Department and the smart mobility sector at the Ministry of Economy and Industry. She joined the Ministry of Economy and Industry in 1997 after graduating from a course for economic representatives. She has worked most of her career in the Foreign Trade Administration (FTA) within the ministry. The FTA is the main body in Israel responsible for the planning and implementing of Israel's Foreign Trade policy and activities.

In addition, over the years, she served in a number of positions at the Ministry:

- > Three missions abroad as an economic representative - in Hungary and the Czech Republic on her first mission abroad (1999-2003), in Italy on her second mission (2007-2010), and in France on her third mission (2013-2017).
- > Director of the Latin America and Africa Department.
- > She served as the content manager of the website of the FTA and of the unit in the ministry responsible for industrial cooperation with multinational companies.

Leora Hadar holds a BA in psychology and business administration and an MBA in finance and organizational behavior both from the Hebrew University of Jerusalem.

Haft Steven

Head of Global Partnerships
Consensys

HEAD OF GLOBAL PARTNERSHIPS at Consensys, largest blockchain software developer in the world. Until 2017, oversaw innovation as SVP at \$3B TIME Inc, earlier CSO strategy at AOL's \$1.2B Ad Sales. Multiple Academy Award nominee, producer of films and tv including DEAD POETS SOCIETY, EMMA, PIRATES OF SILICON VALLEY & MADtv. Steven Haft is a Fellow at HBS Prof Clay Cristensen's Disruptor Foundation and a Trustee (Emeriitus) at The Sundance Institute.

Harris Aaron

CTO
Sage

Aaron Harris has more than 20 years of high-tech engineering experience in business applications and software development strategies. From Sage Intacct's earliest days, Aaron has led the company's product vision and technology direction. A pioneer in cloud computing, Aaron helped Intacct build the world's first cloud architecture delivering on-demand financial applications. He regularly contributes to the development of best practices for cloud computing, service oriented architecture, platform as a service, and accounting and finance technology standards.

Prior to launching Intacct, Aaron was a member of Arthur Andersen's Developers' Coordination Council, where he evangelized emerging development technologies, established best practices, and built infrastructure software development tools, focusing on remote data access and web services technologies.

Aaron holds a Master's degree in information systems and a Bachelor of Science in accounting from Brigham Young University.

Hasar Yariv

Division President
Amdocs Development, Amdocs

Yariv is a seasoned leader and experienced executive in technology and development with a profound record in the software and communications industry.

In the last couple of years, as a General Manager at Amdocs, Yariv is focused on portfolio management, technological excellence and innovation, while building the DevOps methodologies through successful execution of large transformation projects.

Yariv has a strong engineering professional background (B.Sc and M.Sc.in computer science) along with an MBA from Kellogg (Northwestern University).

In his spare time Yariv continues to practice some software development, reads fiction, managerial, philosophy and science books and articles and enjoys rock music.

Horev Amos

Former President of **Technion University** &
Chairman of **Rafael**

Amos Horev, born in Jerusalem in 1924, is a nuclear scientist and military expert. He became the first Israeli-born president of the Haifa-based Technion, Israel's world-renowned Institute for Technology in 1973, serving in the position until 1982.

From 1995 to 2001, Horev served as chairman of the board of directors of Rafael Advanced Defense Systems, the armament development authority for Israel's Defense Ministry.

He also served as director of numerous other companies, corporations and government-linked organizations, including Elscint, Bank Leumi Investment Company and Dan Hotels Corporation.

Huldai Ron

Mayor
Tel Aviv-Yafo

In 1998, Ron Huldai was elected the ninth Mayor of Tel Aviv-Yafo, the first Modern Hebrew city, founded in 1909. He was reelected for his third consecutive five-year term in 2008.

Huldai's vision for Tel Aviv-Yafo is to further solidify the city as the epicenter of pluralism and liberalism, higher education, commerce, scientific achievement, quality of life and the focal point of Israeli art and culture.

The accomplishments of Huldai's administration have had a demonstrable impact on the city; most significantly, Mayor Huldai has eliminated the municipal deficit and has streamlined the city's workforce. In light of this economic turn-around, Standard and Poor's has affirmed the city the coveted AAA rating.

Mayor Huldai works tirelessly to create a balance between the national draw to the city's cultural attractions and improving local residents' quality of life. While making it a priority to upgrade facilities, much emphasis is being placed on returning the public sphere to the residents.

Huldai has increased allocation of budgetary funds to improve living conditions and infrastructure in the lower-income areas of the south. Another top priority for the Mayor has been improving infrastructure, living conditions and the social fabric of Yafo (Jaffa).

Ron Huldai was born in 1944 and raised in Kibbutz Hulda. He joined the Israeli Air Force in 1963 and served as a combat pilot for 26 years, including during the Six Day and Yom Kippur Wars. He served as commander of two of Israel's largest air force bases and retired from the Israeli Air Force with the rank of Brigadier General.

After his military service, Huldai had the opportunity to pursue his life-long dream. Following in the footsteps of his parents, who were educators, he became principal of the renowned Gymnasia Herzlyia, among Israel's most prestigious high schools. During his tenure he transformed a much-deteriorated institution into a pedagogical showcase of educational and organizational excellence.

Huldai is a distinguished graduate of the United States Air Force's American Air War College ('81) and holds a Bachelor of General Studies from Auburn University of Montgomery ('81).

Mayor Ron Huldai is married to Yael, and they have three children and seven grandchildren. He enjoys cycling along the city's beachfront, is an avid reader, an amateur musician and frequent sampler of the city's cultural offerings.

Idan Irit

E.V.P R&D
Rafael

Irit Idan is Executive Vice President for Research and Development at Rafael Advanced Defense Systems Ltd., Israel's third largest defense company.

Rafael is world-renowned for pioneering breakthrough defense systems, such as Iron Dome and Trophy.

Dr. Idan received her PhD in astrophysics from the Faculty of Physics at Technion in 1994. She serves on the board of directors of several companies both in Israel and abroad, and is a member of the Technion Council and International Board of Governors.

Kanayama Miki

Global Account Producer
Dentsu

Started my carrier at Dentsu in 2014.
Digital Marketing & Advertising consultant
Global Account producer.
In charge of Sourcing Israeli Market.
Producer in acceleration program of start-ups

Kandel Eugene

CEO
Start Up Nation Central

Professor Eugene Kandel is the CEO of Start-Up Nation Central, a non-profit dedicated to strengthening Israel's innovation ecosystem and connecting world business, government, and NGO leaders to the people and technologies in Israel that can help them solve their most pressing problems.

Between 2009 and 2015 Professor Kandel served as the Head of the National Economic Council and as the Economic Adviser to the Prime Minister, and played a central role in all the major decisions on economic policy.

Kandel is the Emil Spyer Professor of Economics and Finance at the Hebrew University in Jerusalem. He holds a BA and an MA from the Hebrew University, and an MBA and a Ph.D. in Economics from the Graduate School of Business at the University of Chicago. Professor Kandel's primary area of expertise is Financial Markets and Financial Intermediaries, and his research has been published in various world-leading Finance and Economics journals. His research was instrumental in the 1997 redesign of the Nasdaq trading rules.

Kane Sean

Co-Founder
f6s

Sean helps startups grow. He's CEO of F6S - the fast-growing 3 million member strong global network that delivers billions from corporates, programs and governments to startups. He has led growth at companies like Bebo (acquired by AOL), Interasting (acquired by Good Technology), mp3.com (IPO'd and acquired by Vivendi). He has also completed coursework at the Harvard Kennedy School, Massachusetts Institute of Technology (MIT), Meiji Gakuin Daigaku (Japan) and ITAM (Mexico).

Kaniel Oren

Co-Founder & CEO
AppsFlyer

Oren Kaniel, CEO and co-founder, bought his first iPhone in 2010, while app developers were rushing to find the next best app, it became very clear to Oren that app marketers had a serious problem: mobile marketers could see a correlation between their marketing investments and mobile app performance, but they couldn't demonstrate a direct link between their marketing activity and business growth; nor could they determine which specific activities were responsible for their success. And it's here, in 2011 that Oren together with Resef Mann founded AppsFlyer to solve one of the major problems in the mobile apps market – campaign measurement and user attribution. Before founding AppsFlyer, he worked at Emerald Stage2 Ventures and held management and engineering positions at Veraz, Avaya and Intel. Oren holds a BA in Computer Science, Cum Laude, from the Technion, and an MBA from IDC, as part of an exchange with the Wharton Business School.

Keren Amit

Business Development
Deutsche Telekom

Amit joined DT Partnership team in early 2014 and brings over 20 years of experience as an international marketing, sales, business development, and operations executive. He started his career in 1995 at a data communications pioneer, which was acquired by Siemens. From there he moved to marketing and sales roles where he led and won multimillion dollar deals. Aside from executive experience, Amit made a couple of attempts to found startups and is an active angel investor and startup mentor. He holds a bachelor's degree in Computer Science and an MBA.

Kerner Lou

Partner
CryptoOracle

Lou Kerner is a Founding Partner of CryptoOracle, a Crypto VC and Advisory firm focused exclusively on investing and advising entities leveraging, blockchain, cryptocurrency, smart contracts and decentralization. CryptoOracle also started CryptoMondays, the largest crypto Meetup in the world with chapters in over 50 cities. Lou has been a Crypto enthusiast, investor, public speaker and thought leader since 2013, when the Wall Street Journal called Lou “Wall Street’s Bitcoin Expert”. Lou regularly hosts conference calls and Meetups with Crypto industry innovators attended by hundreds of Crypto enthusiasts and investors from around the world. Lou is ranked among the Top 10 most influential Crypto bloggers on Medium, regularly keynotes major Crypto industry events, and often appears on TV or in print talking about Crypto.

Prior to CryptoOracle, Lou was a Partner at the decentralized VC, Flight, where he managed The Israel Founders Syndicate. Prior to Flight, Lou was the Managing Partner of The Social Internet Fund (SIF), which invested in shares of rapidly growing tech companies. Prior to SIF, Lou was an angel investor, best known for investing in Facebook and writing the first Wall Street style research report on the company in 2010. Before angel investing, Lou ran two digital companies, Bolt (the largest social network before MySpace), and .tv, which commercialized the top-level domain (.tv) licensed from the tiny island nation of Tuvalu. .tv was acquired by Verisign. Prior to .tv, Lou had a distinguished career as an equity analyst following media and tech companies for Goldman Sachs and Merrill Lynch.

Lou has a B.A. from U.C.L.A. and an MBA from The Stanford Graduate School of Business.

Kissos Hertzog Michal

CEO
Pepper

Michal Kissos Hertzog leads Pepper, Israel's first mobile-only challenger bank that was launched in mid-2017. Pepper, part of the Leumi Group, represents a revolution in how millennials think about and manage their money in a digital world. It is based on a AI technology that helps customers better manage their finances and make the most of their money.

Michal has over 12 years of experience in digital banking, strategy and corporate development within the Leumi Group. In her previous role, Michal served as Head of Innovation and Digital at Leumi. She was responsible for leading and implementing digital innovation across all business lines of the Group, alongside managing 'Leumi Digital' – the bank's digital banking channels. Michal also served as Head of Corporate Development at Leumi's Retail Banking Division and held several managerial positions at 'Leumi Card', Leumi's credit card company.

Prior to joining Leumi, Michal spent several years as an attorney at GKH law offices, one of Israel's leading law firms, specializing in corporate and commercial law, securities and M&A transactions. Michal holds a B.A. in Economics and an LL.B. from Tel Aviv University, and an MBA from IDC Herzliya (Wharton Executive Program).

Kletzkine Jeremie

Vice President of Business Development
Startup Nation - Israel

Jeremie Kletzkine, VP of Business Development at Start-Up Nation Central. Jeremie is an entrepreneur and executive with technological expertise. He previously served as the Director of Worldwide Business Development at PrimeSense (acquired by Apple). Over the course of the last decade, Jeremie founded 2 startups, has mentored, and advised several VCs, accelerators and sits on the boards of various technology companies.

Koren Ruthi

Daniel recently founded IntelliMedicine, focused on personalized, data driven, precision medicine. He is also the inventor of the MarrowMiner, an FDA approved device. Daniel is an avid pilot and has served in the Massachusetts and California Air National Guard as an officer and flight surgeon with F-15 & F-16 fighter Squadrons. He has conducted research on aerospace medicine that was published with NASA, with whom he was a finalist for astronaut selection.

Kraut Julia

Director
Global Cybertech Events

Julia Kraut is Partner and Director of Global Events at Cybertech, one of the largest cybersecurity networking and events platforms around the globe. Under her management, Cybertech has grown from one annual event in Tel Aviv, to a global network of events in such places as Singapore, Tokyo, Los Angeles, Toronto, Rome, Indiana, Panama and more. Cybertech global events attract thousands of attendees from across a wide range of sectors, and has positioned itself as the global meeting place and dialogue center for anything cyber, innovation and technology. In 2018, Julia opened the U.S. subsidiary of Cybertech, Cybertech USA, and manages all new operations for the U.S. market.

Julia resides in New York City, and has a MA from the Johns Hopkins University in Public Policy & Security Studies, and a BA from the IDC Herzliya in International Relations and Middle Eastern Affairs. In her spare time, she likes hiking and watching 'Seinfeld' reruns.

Kreindler Jack

Medical Director
Centre For Health and Human Performance Ltd

Dr. Jack Kreindler is a physician, physiologist and serial technology entrepreneur. Since 1997, alongside his career as a doctor in emergency and high altitude medicine, Jack has worked with, founded and incubated numerous pioneering ventures in information technology, biosensors and machine intelligence. His projects include Douglas Adams' H2G2.com (acquired by the BBC), Vielife (acquired by CIGNA) and Sentrion Remote Patient Intelligence. In 2007 Jack founded The Centre for Health and Human Performance in London, applying elite sport science to help not just our greatest athletes but also the most unlikely taking on extreme pursuits and the sickest patients facing their greatest challenges. Jack and his 'Weird and Wonderful' team of thought leaders dedicate much of their time to public engagement promoting transformative innovation in healthcare and the life sciences for organisations including Founders Forum, Singularity University, TEDx London, The Science Museum and WIRED. Jack lectures globally on the future of medicine and is frequent television presenter for CNBC, Sky Sport, BT Sport and the BBC.

Krieger Naomi

Head of Societal Challenges Division
Israel Innovation Authority

Naomi Krieger Carmy is Head of the Societal Challenges Division at the Israel Innovation Authority. The division addresses the challenge of developing and attracting high-skilled human capital for Israel's knowledge-based industry with a variety of programs, and also funds and promotes technological innovation addressing societal challenges such education, welfare and the effectiveness of the public sector.

Naomi was the founding Director of the UK Israel Tech Hub, an award-winning initiative by the British government to connect the two countries in innovation and technology, which has since been replicated globally. Previously, she was General Manager of STRIVE Israel – a national program helping the unemployed develop meaningful careers. She began her career in the private sector as an investment banker at Lehman Brothers, where she worked on mergers and acquisitions, IPOs and valuations for leading technology companies.

Naomi holds a Masters in Public Policy from the Kennedy School of Government at Harvard University and was a fellow at Cambridge University's Centre of Science and Policy.

Levanon Ariel

Vice President Cyber Security
Mellanox

Ariel Levanon is an expert on cyber security and managing complex intelligence projects. Mr. Levanon currently is Mellanox VP Cyber Security, responsible for defining Mellanox Cyber security architecture, roadmap and solutions for Cloud Security. His areas of expertise include cyber threat intelligence as well as cyber security networks analysis. He specializes in Cyber security for complex systems and networks, including Hardware and Software technologies.

Mr. Levanon brings with him 20 years of working experience in Cyber & Intelligence positions . Ariel served as a Major in the IDF's intelligence unit for 17 years, where he led a number of Cyber & Intelligence Groups dealing with highly complex technological projects that received Special awards for Excellence.

Mr. Levanon holds a B.S.C in Electrical and Software engineering and an M.B.A from Tel Aviv University, specializing in Technological Management & Entrepreneurship, Cyber-Security and Marketing Management

Levy Maurice

Chairman
Publicis Group

Maurice Lévy is Chairman of the Supervisory Board of Publicis Groupe, the leader in business, marketing and communications transformation.

He joined Publicis in 1971 as IT Director, and was appointed CEO of Publicis Conseil, the Groupe's flagship agency, in 1981. He was named CEO of Publicis Groupe in 1987, a role that he fulfilled for 30 years until being named Chairman of the Supervisory Board as of June 1, 2017. He was responsible for transforming Publicis from a great, French creative agency into a global leader, covering all segments of the advertising industry. With spectacular acquisitions such as Saatchi & Saatchi, Bcom3 (Leo Burnett, Starcom, Mediavest) Zenith or in the digital space with Digitas, Performics, Razorfish, Rosetta and Sapient, today Publicis represents more than 80,000 talents, \$10 billion in revenue and is present in more than 104 countries.

In 2016, to celebrate Publicis Groupe's 90th anniversary, Maurice Lévy was determined to look to the future rather than the past, keeping in line with Publicis' pioneering spirit. The result was two initiatives – Publicis90, through which Publicis Groupe invested in 90 promising startups and Viva Technology Paris, a global event dedicated to the collaboration between large companies and startups. Widely recognized as a leading figure in the communications industry, Mr. Lévy also co-founded the French Brain Institute (ICM) in 2005, and serves as the Chairman of the board for several entities, including the International Board of Governors for the Peres Center for Peace. In 2015, he was appointed Chairman of the Pasteur-Weizmann Institute. Mr. Lévy has been honored with numerous distinctions and accolades for his contributions to media, business leadership, tolerance and peace. Mr. Lévy holds the distinctions of Commandeur of the French Légion d'Honneur and Grand Officier of the Ordre National du Mérite.

In recognition of his 30-year involvement and achievements in advertising as well as exceptional philanthropic work within and beyond the communication industry, Maurice Lévy has been inducted into the 70th AAF Advertising Hall of Fame at a gala event in New York on April 30, 2019.

Mann Reshef

CTO & Co-Founder
AppsFlyer

As the CTO and co-founder, Reshef Mann leads a strong, growing R&D team at AppsFlyer. Reshef and his best friend (and co-founder) Oren Kaniel, put their engineering background to work, and spoke to app marketers to better learn their pain points and saw the need for a mobile attribution and marketing analytics platform to provide more transparency across the marketing industry. After seeing an opportunity to create mission critical software to serve and capitalize on the rapidly developing mobile ecosystem while creating a software devoid of conflict of interest, AppsFlyer was born. Before starting AppsFlyer, Reshef has worked on various web technologies and distributed systems in Intel, SAP and startup companies like Jajah (acquired by Telefonica) and Xsights. Reshef holds a BSc in Information Systems from the Technion. Web technologies lover with appreciation to excellent UX and aesthetics

Michaeli Michal

Director of International Economic Development
Tel Aviv Global & Tourism

Tel Aviv Global is a municipal company managed directly under the Office of the Mayor of Tel Aviv-Yafo. Its primary efforts are directed toward making the city more accessible to the world and facilitating its quantum leap in the global arena, achieved in cooperation with municipal, national and, private partners.

The International economic development department is focusing on fostering the city as a global center of innovation - The world's Beta Site: A municipal-national effort to attract int'l entrepreneurs, investors and startups, through creating value, eliminating barriers and creating a set of incentives. By doing so - allowing Tel Aviv to develop from the center of the "Startup Nation" to a world-leading innovation hub.

Before joining Tel Aviv Global, Michal was the Founder & Managing Partner at Eva Ventures – An angel group investing in gender diverted exceptional Israeli start-ups.

Michal has extensive experience in working with leading companies ranging from cutting edge startups to retail and consumers market leaders. Her expertise is on helping startups define their vision, mission and initial strategy. Before 'jumping' to the entrepreneurial and start-up scene, Michal managed Pelephone's roaming division, increasing the service technologically and profitability.

She is a mentor at the 8200 Impact accelerator program and DRIVE - the Technion accelerator and volunteer as a mentor for young entrepreneurs in the Unistream program. Michal was also a member of the Ministry of Economic task force on 'Women in tech' and a speaker in international forums and events.

Ms. Michaeli holds a Master of Business Administration from the Hebrew University of Jerusalem, and a Bachelor's degree in Arts (Management and Behavior Science) from The College of Management Academic Studies.

His research on user interface technology and on optimization of computer networks led to his bringing the ARPAnet to Philadelphia in 1974. From 1982 to 1989, he served as President of Renaissance Technologies Corp. in New York. He is currently helping to nurture a number of startups in both early stage venture and quantitative investing including MyndYou and Augury Systems.

Muirhead Richard

Founding Managing Partner
Fabric VC

Fabric is a VC fund adapting the early, technical, and patient approach of venture capital to investing in Web 3.0 and decentralised data networks. Backed by OpenOcean (a leading European fund focusing on “delicious” and data-intensive software at Series A) and Firestarttr (a seed stage investment platform), Fabric invested in projects including Polkadot, Ocean Protocol, Orchid, Blockstack, zeppelin_os, and Keep. Combining a pedigree in open source, developer-oriented tools, and early stage venture investing with blockchain focus since 2013, investments Richard has made personally and/or led via a fund include Pantera Venture Fund, Bitstamp, Bitrise, Tray.io and Citymapper. Richard was previously a 3x software entrepreneur, building/ scaling Automic (CA), Tideway (BMC), and Orchestream (Oracle) - reaching a cumulative market cap of \$2.2bn.

Munafo Ariel

CBO and Senior Cloud Advisor
CloudEdge

Ariel is a Cloud Computing Evangelist and a Senior Cloud Advisor to CTOs and CIO with deep technical knowledge and practical experience in the area of cloud computing. He is also leader of the largest cloud computing community in Israel and Manage the Israeli Government forum of knowledge, working under government ICT authority. With over 20 years experience as a professional in a wide variety of roles in many Startups and enterprises, working as a Developer, BI expert, DBA and Cloud Computing Solution Architect, Ariel has an broad view of current and future IT challenges.

Narayan Ravi

CEO
T-Hub - India

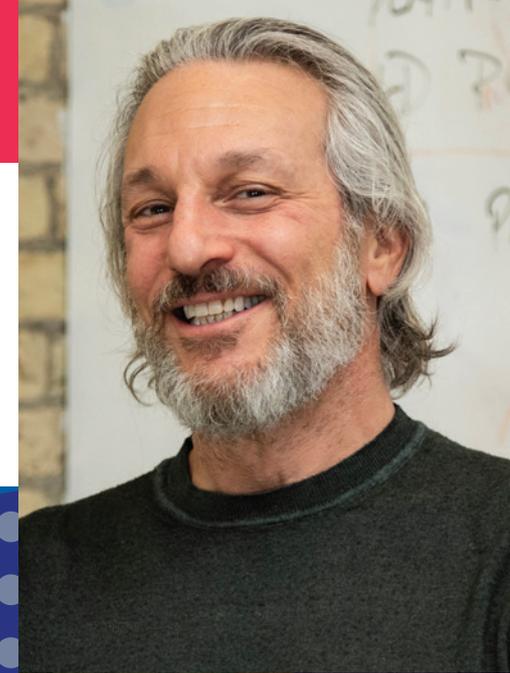

Ravi is the Chief Executive Officer at T-Hub, which enables and empowers an ecosystem hungry for innovation. Based out of Hyderabad, India, T-Hub leads India's pioneering innovation ecosystem that powers next-generation products and new business models. It currently houses India's largest tech incubator and leads programs with large corporations like Boeing, Facebook, and United Technologies along with several international institutions. In a career spanning over two decades, Ravi has been a product engineer, entrepreneur, investor, mentor, and leader. He has co-founded three companies that he led from their inception to their successful acquisitions. As the global director of Microsoft for Startups, Ravi has helped establish Accelerators and Co-sell Programs across the world. He also worked with the portfolio of Temasek funds in Singapore to help them with digital transformation by collaborating with global startups. Mentor Partners, a venture capital fund that he co-founded, invests in product startups from India building for the global market. With a marked focus on creating world class products out of India, Ravi has been actively involved in India's startup ecosystem. By helping create startup density in the product space of Bangalore, Ravi is a key player in its evolution beyond being a hub for services. Besides advising government of Karnataka, Ravi has also advised with other national governments such as Singapore and Malaysia. During his time in Bangalore, he chaired TiE Entrepreneurial Summit (TES), NASSCOM Product Conclave and PAN IIT Conclave. An engineer from IIT Madras, Ravi also holds an MS, and an MBA from the University of Southern California. Having seen every facet of an entrepreneurial journey, Ravi now spends his spare time amalgamating age-old wisdom from the scriptures and classics with his experiences so one can lead a balanced, and fulfilling entrepreneur's life.

Noss Elliot

CEO
Turows

Under Elliot, Turows challenged how software was distributed in the 1990s and how domain names were offered and managed in the 2000s and is challenging how mobile phone service and fixed Internet are provided today. For nearly twenty years, Elliot has loved and championed the Internet as the greatest agent of positive change the world has ever seen. Through his role at Turows, his involvement in ICANN and his personal efforts, he has lobbied, agitated and educated to promote this vision and protect an Open Internet around the world.

Novik Gilad

Partner
Lakestar

Gilad brings more than 20 years of experience in investing, product management and technology innovation. With significant European, US and Asian experience, Gilad has a world class reputation in the technology, telecommunication and internet worlds, with special access to global networks in academia and research institutes.

Before Lakestar, Gilad acted as CTO at Horizons Ventures. For six years, he successfully identified and engaged with all of Horizon's investment activities, winning some of the key tech deals in recent years in the US and Europe.

Notable investment exits include Waze, Onavo, Summly, DeepMind, Misfit and Hola. Earlier, Gilad worked with the Hutchison Group for 10 years on senior strategy, innovation and research roles in Tel Aviv, London, Berlin and San Francisco.

Gilad holds degrees in Telecommunications Engineering and an MBA. He is a member of the Technion University Board of Governors and was ranked among the "Top 100 influencers in Israeli Hi-Tech" in 2015.

Novgorodskaya Alena

Schwartz Eytan

CEO
Tel Aviv Global

Eytan Schwartz is the CEO of Tel Aviv Global, a municipal initiative aimed at positioning Tel Aviv as a global city. In his position, Eytan oversees Tel Aviv's international efforts, including the attraction of foreign business to the city; the promotion of Tel Aviv as an urban destination for visitors; the branding of Tel Aviv globally and the growth of its international markets.

Before being appointed to his current position, Eytan served as Senior Advisor to Tel Aviv-Yafo's Mayor Ron Huldai for International Affairs, where he was in charge of managing all diplomatic and international operations of the Mayor's Cabinet. During his time as Senior Advisor to the Mayor, Schwartz designed and implemented a new municipal strategy to absorb the growing numbers of immigrants in the city, as well as designing and managing various public campaigns to position Tel Aviv abroad.

In 2013, Monocle Magazine named Schwartz among its 10-people Dream Team of municipal officials from around the world. Schwartz has a BA summa cum laude in Anthropology from Columbia University and MA in Middle Eastern Studies from Tel Aviv University.

Eytan resides in Tel Aviv with his wife and three children. He speaks Hebrew, English and French.

Schwitzer Limor

CEO
MOV.AI

Seasoned technologist entrepreneur with a passion to create startups that engage talented teams in transforming ideas into products and mind share. Limor heads RoboSavvy, a company that distributes & develops advanced mobile robots, 3D printers and parts & tools for making them. RoboSavvy projects include Fonzie the "Twerking robot", FRHANK the gamer sidekick "Fridge Raiders dispenser", Frankie the Segway riding humanoid and Ground Drone, the first camera-man replacement robot. Limor started companies in diverse areas such as Telecom Billing, Internet Security and Social Email Templating. He has been granted many patents and is a regular speaker at tech events. Born in the UK, lived in Italy, USA, Israel and currently in Portugal. Served 3 years in the Israeli Army-Intelligence, studied Physics, still enjoys coding, 3D design and animation.

Schwarzinger Stephan

CEO & Professor, ALNuMed GmbH
Bayreuth

Stephan Schwarzinger is professor at the Research Center for Bio-Macromolecules and manager of the North Bavarian NMR Centre (NBNC) at the University of Bayreuth, Bavaria.

After finishing his studies in chemistry in Linz, Austria, he worked as postdoctoral researcher at the Scripps Research Institute in California in the field of protein folding. He then moved to the University of Bayreuth, where he finished his habilitation in protein mis-folding. There, he is now heading a research group on food quality and authenticity.

His research focuses on quick fingerprinting of ingredient profiles of food. To derive quantitative ingredient profiles of food within only minutes of measurement time Prof. Schwarzinger utilizes magnetic resonance (NMR) spectroscopy to screen dozens of ingredients that can be present at very different concentrations. The resulting ingredient profiles represent digital fingerprints of foods that not only include information on the quality of the food per se, but also information about geographic origin, species, production method and possible fraudulent admixtures. In particular, he has made important contributions for establishing NMR-profiling in the honey and edible oil sector.

Prof. Schwarzinger is a co-founder of ALNuMed GmbH, who develops and puts to the market NMR-based tests for food authenticity and traceability. With his team, he is pioneering the combination of different analytical methods (including NMR, LCMS, optical methods and IRMS) for digitizing food. When linked with distributed ledger technologies such digital food fingerprints will substantially improve the traceability of foods in global supply chains.

Seal Daniel

Founder & CEO
Unbound

Daniel is a serial entrepreneur and the Founder & CEO of Unbound, an ecosystem builder which bridges the gap between entrepreneurs, corporate business and governments to fuel a digital future. He serves as the host to Unbound's award winning innovation festival series which takes place in Singapore, London, Miami, Abu Dhabi and Bahrain and collectively attract over 25,000 delegates from around the world. His successes with Unbound have led him to receive the award for the Best Trade Conference in Singapore from the Singapore Tourism Board and accept the Key to Miami-Dade County from the Mayor.

In June 2018, Daniel sold a controlling stake of Unbound Innovations to SingEx, a wholly owned subsidiary of Temasek Holdings, the investment company of the Singapore Government. As of June 2018, it is reported that Temasek has over \$250 Billion of assets under management. Daniel is an angel investor, mentor & advisor to many startups around the world.

He is a thought leader on government's role in innovation, how to create knowledge-based economies as well as digital transformation and entrepreneurship. He is an active angel investor and advisor to many startups with a focus on SE Asia and how western companies can scale into Asia Pacific.

From 2010 – 2015, Daniel was one of the youngest elected officials to the London Borough of Barnet representing Garden Suburb Ward. While in office, he was Chairman of the Residents Forum, Vice Chairman of Resources, Assistant Cabinet Member for Policy & Performance, and Pension Fund Committee Member. Daniel was re-elected in 2014 with an increase percentage of the vote but stood down in May 2015 to concentrate on his business interests.

Daniel was listed number 24 in '40 Under 40 Future Leaders', which was featured in the UK & International press. Prior to founding Unbound, he was CEO of one of the largest business networking organizations in Europe. Previously, he was a Co-Founder & COO of Bedside Manner, a software platform, which provided crowd feedback to medical professionals.

Daniel has a BSc (Hons.) in Biochemistry and an MSc Business Management from the University of London. In his spare time, he enjoys skiing, airsoft and scuba diving.

Shafrir Amit

Co-Founder & CEO
Quiv

Amit is an advisor to companies in various verticals such as Medical Devices, Consumer Internet, and SaaS. Amit is the co-Founder of Quiv, a marketplace of askers and experts where the proceeds benefit charitable organizations. Previously, Amit has co-founded a few companies in the senior care tech space. Among them, SaferAging.com, lert.ly, and OurParents.com (sold). Amit has vast expertise in both consumer Internet and enterprise software, having managed some of the Internet's most powerful brands such as icq, Netscape Security Solutions, and WinAmp. Badoo, and AOL Premium Services. Products that have acquired over 1 Billion users, and have generated over \$2 Billion in shareholder value. Amit has also held senior position at Amdocs, providing software services to companies like AT&T, Sprint, Nextel and T-Mobile. Amit holds a BA and MBA degrees from Tel Aviv University. He lives in Bethesda.

Sher Guy

General Manager
Via Mobility Israel

Guy Sher is the General Manager of Via Mobility Israel. He is responsible for both business development and execution of Via's deployments in Israel. Prior to joining Via at 2018, Guy worked as the Chief Finance and Operation Officer in an International large-scale technological projects company.

Guy is a graduate of Hebrew University in Jerusalem (History & Interdisciplinary studies) and holds an MBA from IDC Herzliya. He also serves as a lieutenant Colonel (res.) in the Israeli army. Guy is married to Noga and a proud father of two.

Shalev Lior

CEO & Co-Founder
Algaemor - SimpliiGood

Lior Shalev is one of Israel's most passionate voices for transforming society through the combination of tech and social entrepreneurship and promoting the double impact ecosystem in Israel.

Lior is the CEO and co-founder of Algaemor an Agritech startup that grows fresh Spirulina -a micro algae as a sustainable food source and plant based protein.

Algaemor is addressing the most fundamental global issues of the Foodtech and Agritech sectors: from malnutrition and food insecurity to the protein gap and implication of industrialized food.

He is the founder of Infogan, an ed-tech company that links parents and preschools. He is the Co-Founder, Investor or Director in 8 more additional startups that combine tech with social commitment from agri-tech and digital health to IOT and water.

On 2018 he was elected by 'Globes' (Israeli business magazine and daily Newspaper) to the list of - "40 most promising under the age of 40, under the category - Social Hi-Tech & Impact".

Lior has more than 10 year track record of seeding and enabling social impact organizations in all sectors of Israeli society. He was a board member of UNICEF-Israel and lead the Israeli innovation project and several other NGO's focused on transforming society through social entrepreneurship.

Lior is also the Co-Founder of "Social Tech Israel" - the biggest community in Israel promoting the social tech ecosystem.

He is an active lecturer speaker of social entrepreneurship, giving recent talks at DLD, Unbound, GES Beijing, Ed-Tech summit and the General Assembly of United Jewish Federations.

Lior is a voice that is helping to turn the "startup nation" into the "give back" nation. His innovative work is focused in particular on childrens education and youth at risk.

He is a hands-on social entrepreneur who is willing not only to roll up his sleeves and raise the money, but then build a self sustaining program that is staffed, successful, and able to stand on its own. His organizing principle is to turn local society into truly civil society in which people recognize their responsibilities towards one another in an empowering way.

Shamim Shaukat

Founder & CEO
YouPlus

Shaukat Shamim is the founder & CEO of Youplus. Prior to Youplus, Shaukat was the founder and CEO of Buysight, a performance marketing company that was acquired by AOL. Prior to Buysight, Shaukat was the founder of Rhythm Newmedia, one of the first mobile advertising companies that merged with Blinx and subsequently went public as RhythmOne (RTHM:Lon). Shaukat was an early member of the Yahoo! team (from 1997, where he led the creation of one of the first messaging platforms, Yahoo messenger). Shaukat was also a partner at Neocarta Ventures, a \$300m early stage venture fund based in Silicon Valley.

It provides Japanese clients with the latest technology and services from Israel.

Tal Karen

Founder & CEO
Tovanoth B'Hinuch (Educational Insights)

Karen Tal is the founder and director of Tovanoth B'Hinuch (Educational Insights), a unique initiative of professional educators and leaders of the Israeli hi-tech and general business community to affect positive change in schools in Israel's social and geographic periphery. The initiative seeks to break the equation between background and achievement by turning around schools in underserved communities.

Tovanoth B'Hinuch developed a holistic model for the transformation of a school based on the perception of the school principal as an educational leader and social entrepreneur, developing management practices, and recruiting a corps of volunteers and partners. Tovanoth B'Hinuch is currently serving 15,500 students in 35 public schools in the urban and geographical periphery of Israel, including secular, national religious and Israeli Arab elementary and secondary schools. There are currently 1500 teachers and 1600 volunteers working with Tovanoth schools, operating three municipal models throughout the country.

Until September 2011, Tal served as principal of the Bialik-Rogozin Campus in southern Tel Aviv. Bialik-Rogozin received both national and international recognition of the school's pedagogic and social achievements..

In 2011, Bialik-Rogozin was awarded the National Education Prize by the Ministry of Education, and was the subject of the film "Strangers No More," which won the 2011 Oscar for Best Short Documentary. Tal was awarded the title of 2010 Honorary Fellow by the Ruppin Academic Center, and honorary doctorate from Ben Gurion University and was the recipient of the 2011 Charles Bronfman Prize, considered to be one of the most important and prestigious awards in the Jewish world. In 2017 she won the Wework Creator Award.

She is a graduate of the Mandel Institute for educational leadership, and holds an MA in Public and Educational Policy from the Hebrew University. Tal teaches a course in TAU for MA education students, which focuses on the Tovanoth turnaround school model. Karen is married and a mother of two.

Tal Yuval

Maker

Yuval Tal is a serial entrepreneur and a technical leader in a variety of startups in media: Out of Tune - a live music game show, Public - a platform for messaging as form for media, Boxee - a social video streaming device. Currently leads the Samsung Next engineering team in New York. Yuval is also a founder of Garage Geeks, an Israeli non-profit organization that promotes creativity in the Israeli high-tech industry.

Tolkowsky Dan

Former Commander
IAF Orange

Dan Tolkowsky born January 17, 1921 is a retired Israeli Air Force officer who served as a major general in the Israeli Air Force (IAF) from 1953 to 1958.

A noted investor, he helped start the first Israeli venture capital fund.

In 1959 Tolkowsky joined the Discount Bank Investment Corporation (DBIC), originally an arm of the Bank, later a public company in Israel. He was appointed as Managing Director in 1965 and Vice-Chairman in 1980. Beginning in 1962, DBIC was the first financial institution in Israel to invest in local hi-tech industry. Tolkowsky helped Uzia Galil start the technology holding company Elron Electronic Industries in 1962. In 1985 Tolkowsky, in partnership with his son Gideon and Frederick Adler, a noted American venture capital investor, founded Athena, the first venture fund in Israel, to invest in Israeli and American ventures, mostly hi-tech.

Tolkowsky is a Commandeur of the French Legion d'Honneur (1958), holds a Doctorate Honoris Causa from the Technion Israel Institute of Technology (1980), and holds an award from the joint US-Israel Science and Technology Authority named after Yitzhak Rabin.

Tykuchinskiy Mikhail

Development Director
Skolkovo Foundation

Mikhail Tykuchinsky has been the Director for Development of the Energy Efficiency Cluster of the Skolkovo Foundation since 2012. Responsible for setting up efficient cooperation programs between large corporations and external innovation ecosystem in the electric power, construction, housing and communal services, oil and gas, metallurgy, heavy machinery industries. Ensures the success of the commercial development of cluster startups by supporting the implementation of their developments in large corporations and supports corporations in setting up open innovation model.

Since 2013, Mikhail is also in charge of the cross-industrial cooperation of the Skolkovo Foundation with large corporations. Thanks to his work, dozens of major Russian and international corporations from various industries implemented joint projects with startups, began active work on a model of open innovation, created their own innovation centers in Skolkovo.

Prior to joining the Skolkovo Foundation, Mikhail worked for more than 10 years at one of the leading international consulting companies, providing support to companies from various industries on improving business performance, making investments in emerging markets, building accounting systems and building reports. He worked in Russia, China and Ukraine.

Mikhail is a graduate of the Economic Cybernetics Department at St. Petersburg State University.

Wienberger David

Writer In Residence
Google PAIR

David Weinberger, Ph.D., has been a pioneering thought-leader about technology's effect on our lives, our businesses, and most of all on our ideas. He has contributed in a remarkably wide range of fields, from marketing to libraries to politics to journalism, and more.

And he has contributed in a remarkably wide range of ways, as the author of books that have made a difference, starting with co-authoring the international best-seller *The Cluetrain Manifesto* ; a writer for a remarkable span of leading journals including *Wired*, *Scientific American*, and *Harvard Business Review* and even *TV Guide*; an acclaimed keynote speaker around the world; a strategic marketing VP and consultant; a teacher; an Internet advisor to presidential campaigns; an early social networking entrepreneur; the co-director of a groundbreaking library innovation lab; a senior researcher at Harvard's Berkman Klein Center for Internet & Society; a fellow at the Harvard Shorenstein Center for Media, Politics, and Public Policy; a Franklin Fellow at the US State Department; and a writer in residence at a Google machine learning research group.

His latest book, *Everyday Chaos: Technology, Complexity and How We're Thriving in a New World of Possibility* (*Harvard Business Review*, 2019) explores how the Internet and Artificial Intelligence are transforming our understanding of how the world and the future work, and how we can are learning to thrive in it.

Dr. Weinberger's doctorate is in philosophy from the University of Toronto. He lives in Boston.

Yaacovi Yoram

Venture Partner
Shenzhen Capital Group Co., Ltd

Microsoft: For seven years and through January 2018, Yoram was the General Manager of the Microsoft Israel Research & Development center, one of the three Microsoft Global Development Centers (GDCs), responsible for the R&D centers in Herzlia, Haifa and Nazareth, developing core cybersecurity, business intelligence and big data analytics products for Microsoft. The center also partners with the local VC and startup community and with the academia. During his tenure as General Manager, Microsoft Israel shipped multiple products globally, acquired seven companies in Israel and founded the Microsoft Startup Accelerator, one of the first successful corporate accelerators globally.

Ecosystem: While at Microsoft, Yoram was a board member of the Israeli Advanced Technology Forum (IATI) and founded the Forum of Multinational R&D Centers in Israel (MNC Forum), a forum that brings together the General Managers of all the Multinational R&D centers in Israel. In 2017, Yoram was appointed to the Board of Directors of the Technion, Israel's Institute of Technology, where he also serves on the Advisory Board of the Computer Science department.

Community: Seeking a higher engagement of Arabs and Palestinians in hi-tech, as a benefit for the people, the industry and the region, Yoram is a Director in Hasoub, a organization that is paving the way for the next generation of Arab Entrepreneurs, and in Co-Impact, the overseeing organization for creating a breakthrough in the rate of employment and quality of employment of the Arab population in Israel. In addition, Yoram is a member of the core team of Breaking the Impasse (BTI), and organization that seeks to bring Israelis and Palestinians together with the vision of two states for two people, and is directing the business initiatives within BTI.

Today: These days Yoram is splitting his time between being a Venture Partner at the Shenzhen Capital Group, the largest VC in China, serving as an advisor to several Israeli startups in cybersecurity, digital advertising and enterprise software, and helping include minorities such as Israeli Arabs, Palestinians and Orthodox Jews in the local hi-tech scene in Israel

Earlier in his career, Yoram was the CTO of the Microsoft Israel R&D, VP R&D, Division President and COO of the products group at Amdocs (NYSE:DOX), responsible for the Amdocs Products suite and spent eleven years in product development roles at Microsoft's Headquarters in Redmond, including products such as Windows 95, NetMeeting, Microsoft Reader, Rights Management Server (RMS) and Office Information Bridge Framework.

Yoram is the co-author of 23 patent applications and several IETF RFCs including Dynamic LDAP. He has a BSc in Computer Science from the Technion.

Yadlin Aharon

Former MK & Secretary General
of the United Kibbutz Movement

Aharon Yadlin was born in Israel.

From 1950 to 1952 he was a member of the executive committee of the Histadrut. He received an MA in history, economics and sociology from the Hebrew University. He was one of the founders of Beit Berl Academic College.

In 1960 he was elected to the fourth Knesset and again to the fifth in 1964, and remained an MK until 1979.

After his retirement from the Knesset in 1979 he served in several public roles, including secretary general of the United Kibbutz Movement from 1985 to 1989. He has three sons and eleven grandchildren.[2] One of his sons is high ranking IDF officer, General (res.) Amos Yadlin.

Prior to that she served as the Head of Deal Flow and Business Development at Deloitte. Naama holds MBA & BA in Political Science and International Relations, both from the Hebrew University of Jerusalem.

Yarnitsky Ariel

Entrepreneur; Advisor; Investor

Entrepreneur with a distinguished track record in the Internet, Technology, Media and Telecommunications industries. Touching the lives of over 1 billion users as Co-GM of ICQ, CEO of Speedbit and founder of technology startups in fintech and communications.

Vast experience in the lifespan of startups as well as large multi-national corporations.
Tech Pioneer by the World Economic Forum.

Zelnik-Manor Lihi

Senior Director DAMO Machine Intelligence
Israel Lab
Alibaba Group

Prof. Lihi Zelnik-Manor is the Head of Alibaba Machine Intelligence Israel Lab since October 2018. Before joining Alibaba she was an Associate Professor in the Faculty of Electrical Engineering at the Technion and a visiting professor in CornellTech in New York. Prof. Zelnik holds a PhD and MSc (with honors) in Computer Science from the Weizmann Institute of Science and a BSc (summa cum laude) in Mechanical Engineering from the Technion. Her main area of expertise is Computer Vision.

Zioud Rabea

Co-founder & CEO
Hasoub

Rabea Zioud is a Physical therapist in his profession, entrepreneur & community leader in his soul, seeking to leave a mark in his Society and in the whole world.

Zioud started his first business When he was 20 years old.

He has been involved in the Israeli startup ecosystem since 2010.

During this years he served as the VP for the MENA region at Voiceitt (Masschallenge Finalist 2014)

Also co-founded Hasoub - non profit Organization that promotes tech & entrepreneurship in the Arab society where he is serving as the CEO nowadays.

With a background in Physiotherapy and years of experience in business development in the assistive technology & social impact fields, He is eager to contribute to more startups in this field, help them grow and expand especially in the MENA region.

Part of my achievements with Voiceitt:

- TEDxjerusalem Talk: <https://goo.gl/if4GQ5>
- WSJ.D Startup showcase: <https://goo.gl/RMgjbD>
- 30 under 30 by MAKO: <https://goo.gl/BvxCpQ>

Airbud

Airbud creates plug and play conversational AI assistants by seamlessly ingesting data on websites to allow users to interact with information via voice or chat, simply and intuitively, leading to increased engagement and conversions. Unlike existing solutions, Airbud provides organizations with frictionless deployment and maintenance processes by automatically building a knowledge graph out of their existing content without any integration, playbooks or training data. Founded by a technical team comprised of Google Duplex, 8200 and Cornell Tech alumni, Airbud's mission is to become the default conversational AI layer for all organizations.

AIRBUD

BackWell

BACKWELL is an Israeli start-up that addresses the problem of back pains which 80% of the population suffer from. Backwell has a patent on a unique system that imitates and mobilizes the pelvis in a walking pattern.

Backwell has succeeded in developing and implementing this patent and created the Active Balance Chair, which exercises the back while sitting and prevents the back pains associated with prolonged static sitting.

This technology is the future of sitting.

We are looking for a partner for producing the Active Balance Chair and present it to the world.

Meir Reingewirtz CTO, Backwell Ltd.

CareeFan

The Talent Pool Platform

New career opportunities, not just vacancies: we offer white collar professionals personal online consultations with the best career consultants and networking with experts from your dream companies and industries.

CareeFan

Cerebro Platforms

Cerebro is an AI patent-pending platform that uses facial analysis and Geo-location technology to automate and optimize the creative content displayed on DOOH screens in real-time. Cerebro is the first system to allow real-time audience targeting including age, gender and other parameters for DOOH campaigns while leveraging current digital screen's inefficient inventory management and providing agencies with a holistic tool to plan and execute DOOH campaigns based on prediction models.

We came to the conclusion that the complexity and inefficiency of the media buying, planning and monitoring in the OOH Eco-system today are holding back agency spends. Therefore, our product is designed to use AI and prediction models, in the effort to do all the heavy lifting of the planning and execution process in the most automated and KPI oriented way possible.

Moreover, as media owners are subjected to high sales and operations costs, limited reach to local buyers, time-consuming manual processes and a linear pricing model for all the campaigns - all of which cause a high unsold spots ratio of approximately 30%-40%, our solution gives the opportunity to monetize unsold spots and to easily connect advertisers to your DOOH units with a Real-Time-Bidding marketplace solution with full transparency and control.

Cerebro gathers real-time audience data from various data sources in two ways:

Geo-location - Cerebro offers comprehensive real-time Geo-location data in order to reach a unique audience segmentation. We partnered with over 2 dozen live data providers (no Wifi or Bluetooth needed) with an approximate reach of over 1B unique mobile devices worldwide. By learning a mobile device's location history, installed applications, visited websites, etc. we are able to create a profile of its owner and deliver a personalized message in real-time. Thanks to our technology, we are able to determine one's demographic information, interest, journey, occupation, economic status and more.

Facial analysis - We use high-end outdoor miniature cameras with special lenses and field servers which are installed on different DOOH units, to provide real-time facial analysis and allow real-time audience targeting. Cerebro's cameras are continuously scanning the audience and analyzing the audience's demographic characteristics. Cerebro's Marketplace is using the live data to display the right ad (less than seconds to trigger an ad).

Our platform is very unique and brings a lot of added value over the current solutions in the market. We have recently partnered with the biggest media agencies in the world and the responses are phenomenal. The key differentiation is the fact that our system combines all aspects of a campaign setup (planning, buying, and monitoring) based on smart automated mechanisms that up to now have not been used in this industry and allows the agencies to reach their KPI's while maximizing the inventory revenue for the media owners.

<https://cerebroplatform.com>

Contextspace

ContextSpace provides Privacy Compliance Automation. It is designed to eliminate more than 80% of the cost of compliance for tough global privacy regulations.

We deliver true cyber-privacy data protection - not just documentation and reporting. Our technology meets the tough operational enforcement requirements for EU GDPR, HIPAA, CCPA, India PDP law, Brazilian LGPD, Japan APPI and similar strict, principle-based privacy and data protection regulations.

Features include:

- Low Code / No Code integration with Enterprise and Digital Applications
- Transparent Data Protection (Privacy Firewall)
- Automated Data Breach Defence, Containment and Resilience
- Privacy Impact Management
- Self-Service Personal Data Rights management
- Personal Data Lake with Data Federation
- Comprehensive Evidence of Processing
- Enterprise Personal Data Governance

The company's platform is offered via affordable "pay as you go" subscription on cloud and/or premises. This enables customers to rapidly achieve privacy regulatory compliance and risk elimination using existing budgets and resource

www.contextspace.com

D-Bug

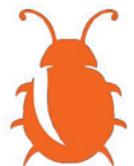

D-Bug is a high school robotics team based in Tel Aviv-Yafo, Israel. The team was founded in 2010 and since then it has grown to be one of the best teams in the ISR District. The team consists nowadays of 20 students (10th-12th grade) and ten mentors, and has made it to the quarter-and/or semi-finals every year since our foundation.

The team competes as a part of FIRST organization's FRC program, in which students must strategize, design, build, wire and program a robot to fit that year's mission, and have 6.5 weeks to do so from scratch. We use military-standard design process, in-house heavy machinery and innovative control systems to engineer high-end robots.

Throughout the years we received many awards for our robots: the Quality Award at the 2018 World Championship in Houston, Texas; Innovation in Control Award at the 2019 ISR District event; Industrial Design Award at both 2018 & 2015 Israel Championships; Excellence in Engineering Award at the 2016 Israel Championship.

In addition to the mechanical work, the team also spreads the STEM values & knowledge to the community around it. During the last 6 years, we opened and mentored 48 robotics teams for kids ages 5-10 of various backgrounds - boys, girls, deaf, religious, and from all over Tel Aviv, north to south. We held and participated in many STEM events, and mentored four middle-school FLL teams, two of which are among the best teams in Israel. Our hard work was recognized by numerous awards, including the most prestigious award in FIRST organization - the Chairman's Award, honoring the team that best represents a model for other teams to emulate and best embodies the purpose and goals of FIRST, and the Engineering Inspiration Award for outstanding success in advancing respect and appreciation for engineering within a team's school and community at the 2017 Israel District Championship.

D-Bug does not only build robots - it is a platform for students to realize their potential, be inspired and develop an enormous love for all things STEM stands for in Israel and all over the world!

Gan4U

Gan4U started as an idea a few months ago, and really gained momentum at the Hackathon that TLV municipality organized. Our goal is to make the communication between kindergartens and parents more effective and efficient. The app sends online notifications to the parents about the kid's daily routine and also general messages about special events and vacations. Our challenge was to think of a way that will need minimum attention to the app, but still will send all the important information to the parents.

Less with the phone, more with the kids.

Loox

Loox is an app that helps educators monitor cognitive, emotional, social and motor development in the early childhood (newborn to 6). Loox is designed to form an accurate and professional profile of the child's progress and needs. The information can be shared with the child's parents and educational services. Quantitative information regarding the kindergarteners' skills can be provided to help plan and improve educational Infrastructure across cities. Creating smarter cities for our children.

Makeme.click

Simplifies complicated online marketing processes and platforms, such as tracking, lead distribution, affiliate referral programs, making it accessible and affordable to every small marketer, agency and beginner.

Makeme.click is a full SaaS solution for any business that wishes to integrate their own partners program within minutes. It is powerful, yet light, equipped with a full set of features, as well as a built in "mini-CRM", meeting every marketing effort, minus the effort.

Mokio

Mokio is an Open Source CMS in Ruby on Rails. Based on this tool, we help entrepreneurs build great products and online services. Our team consists of technology enthusiasts working in Poland for the clients from the whole world. Great designers, business analysts, developers, marketing freaks - we have them all on board.

<http://dld.mokio.org>

Myoji

Myoji is an image tech company which makes Myojis- photo animations.
Meaning- taking a users' still photos and bringing them to life, through magnificent animation templates.

Myoji

MyWay

Choose your way of walking.

Myway is a free mobile navigation app that finds real-time personalised walking paths based on your own needs.

Walking in the city can often be unpleasant and stressful experience - high volume roads, blocked sidewalks, radiating sun, horrible noise or pollution.

Myway will present you with several possible routes to reach your destination - the quiet route, the shaded or the one with the widest sidewalks. Choose what works best for you.

You might be walking with a stroller, a dog or late at night - Each, requires a different set of considerations, that's why Myway was born. To help you make a better, more informed choice.

Our vision is to empower pedestrians, providing them with more confidence to walk in the urban areas, enjoy a healthier lifestyle, stimulating the local economy and enhance environmental awareness.

Do you want to use Myway in your city?

Contact us - Info@mywayapp.co <https://www.mywayapp.co>

N.Exchange

The planet's simplest and most convenient solution for cryptocurrency acquisition & trading. For individuals and enterprises alike.

Nutricco

The NUTRICCO platform empowers people to maintain a healthy nutritional balance simply and conveniently.

Based on personal profile, nutritional habits and activities the system optimizes nutritional intake, provides personal recommendations for diet and supplements and empowers people to gain control over their health.

Nutricco developed a home device linked to an interactive smartphone APP that dispenses a daily personalized mix of dietary supplements.

The opportunity is Huge – US dietary supplements market is estimated around 40B USD and with about 160M daily users it is constantly growing. With about 55,000 of different types of supplements available in the market, the users are lacking a simple personal since-based tools for the decision making and here comes Nutricco.

Our all-inclusive subscription-based model together with innovative technology provide people with the simple tools to make an educated decision about their health. For only \$50/month people get the:

- Dispensing Unit
- Smart APP
- Basic Dietary Supplements

We will not encourage the use of dietary supplements but rather eating healthy as the default and consuming supplements to fill nutritional gaps when needed.

Our solution could disrupt the multibillion-dollar supplement market, providing simple tools to manage nutritional balance and empowering subscribers to take control over their health. Our partners will gain loyal customers, reoccurring income, additional channels and data.

Parkam-IP

ParKam developed a unique vision-based software solution for the global parking industry- supporting existing cameras.

ParKam processes live image streams from cameras installed on-street and off-street to collect parking and traffic flow insights and probabilities. Our solution identifies parking vacancy, provides in-app navigation, recommends dynamic pricing of parking spots and even identifies parking violations -all in real time and with unprecedented accuracy.

With ParKam's artificial intelligence and deep learning based system, one can look over as many as 100 parking spots with one single camera.

Rivver

Rivver is a platform for investment funds to issue securities and manage their fund administration processes, powered by Distributed Ledger Technology. By making a security digital and using Smart Contracts, Rivver encodes matters such as ownership, regulatory compliance and contractual limitations into a Digital Fund Interest. The Rivver Platform provides a full infrastructure for funds to issue securities and afterwards manage their back office processes such as: investor on-boarding, capital calls, portfolio management, reporting, distributions, and more. Rivver enables fund managers to provide their investors with an additional source of liquidity, raise capital more effectively and facilitate audit.

<https://rivver.io>

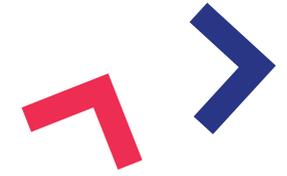

Snov.io

Scale business connections rapidly and boost your sales with a powerful and personalized email outreach.

<https://snov.io>

Snov.io

Sonarix

Sonarix introduces the AI-enabled ultrasound - offering on-demand medical imaging for non-skilled users anywhere. Our solution provides vital ultrasound imaging for diagnostics and screening of various clinical conditions without requiring skilled technicians or radiologists on site, instead of having to refer patients to an imaging center or a hospital. Our innovative and patent pending technology provides an automated imaging procedure by combining unique sensor positioning and real-time image guidance based on machine vision, overcoming the current need for extensive technical skills to perform ultrasound image acquisition. Sonarix has successfully validated its technology in a clinical pilot, comparing its autonomous ultrasound scan to a standard ultrasound scans performed by certified and skilled sonographers.

<https://www.sonarix.co>

SQream

SQream has redefined big data analytics with SQream DB, a complementary SQL data warehouse harnessing the power of GPU to enable fast, flexible, and cost-efficient analysis of massive datasets of terabytes to petabytes. SQream DB significantly reduces query times, minimizes data preparation, and enables previously unobtainable business intelligence.

<https://sqream.com>

TakeTask

- TakeTask is a Polish StartUp, founded by Sebastian Starzyński. It's a Field Force automation platform with advanced confirmation of tasks fulfilment by replacement of paper forms and checklists with a one comprehensive mobile app.
- Our Field Force automation is used by Retail, Convenience, Petrol Stations also for Merchandise & Promotion, Replenishment, Store Operations. Use of our solution prevents hazards at your shops and restaurants and helps to ensure brand standards.
- We aim to help retailers and other companies with dispersed labor force to simplify management of their tasks and to make sure that all of them are carried out to the highest standards.
- No matter what processes you need to implement - Visual Merchandising, Replenishment, Store Safety, Store Maintenance, Food Safety, Promotional Activities – we turn time consuming and uninspiring tasks into ones which are fast, simple and stress-free.
- We manage multiple data sources to speed up the performance such as GPS, barcode scanner, Real Time Image Recognition, Machine learning and we also integrate with IOT.
- We work in a SaaS model and implementation of our system is relatively easy and fast as for an enterprise software used by thousands of employees per company.
- That's why our list of happy clients is growing fast in Europe and we got our first tests on other continents.

<http://www.taketask.com/en>

Talent Alpha

Talent Alpha is building a Human Cloud Platform that will unlock the brain power of IT Service Companies in Central & Eastern Europe (700,000+ IT Specialists). By vetting the skills & mapping the availability of each Tech Team, we provide Enterprise Clients around the world with the best possible Tech Teams on Demand.

<https://talent-alpha.com>

TKBEL

TKBEL is an application that allows any speaker to be heard directly in the participants' headphones. At the end of the conference or visit, the participant will have the opportunity to download an audio or pdf file and come back to the conference in which he participated.

<http://tkbel.fr>

Ulala Chef

Quality of restaurant, now in comfort of your home!

Ulala Chef is a internet platform where customers can choose and book a private chef for a dinner party at their own home. We select best chefs on the market and connect them with our customers.

Ulala Chef was created primarily for private parties arranged in houses of our Clients. However, it quickly turned out that our concept and diversified offer are an ideal response to the needs of Clients in the business sector. In this way, from the very beginning, our chefs in many different and interesting forms also highlight your business receptions, conferences, and training. We operate dynamically and invite you to cooperation. Let's build something together!

<https://ulalachef.com/en>

Zoomd

Zoomd (Public Traded: ZOMD), is a first-of-its-kind site search, mobile user-acquisition and retention platform. Offering one solution for both online publishers and advertisers looking to increase content monetization via higher user engagement. Zoomd Publisher's business has a specific focus on leveraging on-site search data to increase monetization results and extend average session length. Zoomd Advertiser's business has a specific focus on mobile apps user acquisition. Zoomd has built a key performance indicator-based algorithm that enables intelligent media buying in a manner that improves the accuracy of consumer targeting. Zoomd provides advertisers the ability to acquire new users, while understanding better the needs of their target audience in almost every existing mobile inventory via a smart platform that connects to more than 600 digital media channels under one unified dashboard, reducing advertisers campaign management resources drastically.

The company successfully completed a public offering and commenced trading in early September on the Toronto Stock Exchange Ventures (TSXv) under the ticker ZOMD.

United Perfectum

Our Expertise

- Web & Mobile Development
- Enterprise Solutions
- Quality Assurance
- Internet of Things
- Graphic Design
- Server Support
- IT Consulting
- Internet Marketing
- DevOps
- Big Data Services
- Machine learning
- AI
- AR/VR

Industries

United Perfectum as outsourced developer successfully works for major corporations dealing with various fields, such as:

- Internet & social networks
- Information Management
- Biopharmaceuticals and Healthcare
- Cyber Security
- Geo tracking technology
- Mobility
- Manufacturing
- Insurance
- Games and entertainment
- E-Learning and Distance
- Telecommunications
- Enterprise Resource Planning

Aciety

Aciety is a b2b software platform, matching clients with the most suitable software development options. It's based on a 1200+ network of software development and product companies from Eastern Europe. The database of products, modules, frameworks and development firms combined with the matchmaking algorithms enable the platform to give you the most competitive offers for any software need. Aciety serves funded startups like Pillar Project as well as big companies like Expedia.

Aciety has a unique software distribution model based on TAP (Token of Aciety Platform). It enables clients to get software with significant discounts. It empowers product providers to grow their sales by having a sales channel of 1200+ partners and providing discounts without losing revenues.

So contact us for:

1. Solving your challenges and needs in software development.
2. Getting high quality software products with significant discounts.
3. Ability to sell your software products via Aciety's platform and companies' network (1200+ firms).

Visit us at aciety.com

Ascender

Ascender's disruptive enabling technology delivers cost- and resource-efficient Cloud execution of Android apps.

Our technology of remote containerization of Android with client-side rendering, no GPUs on the server, enables Android apps to be viewed on the client without performance compromise. Non-Android platforms, such as Windows, iOS, Tizen, and web browsers, can thus provide Android applications via the Cloud. Ascender's technology provides native performance with low latency and extremely low network bandwidth for Android apps, via the Cloud.

ASCENDER TECHNOLOGIES LTD.

Askapedia

The world's most advanced platform for managing the wisdom of crowds

"Big Data" is one of the business world's most expensive and sought-after resources today. Can this resource be gained in a quick and cost-effective manner through smart use of the wisdom of crowds? This is precisely where our platform enters the picture.

Surfers

Today, more than ever, surfers consult with each other and seek to discover what others think and like. With Askapedia surfers can upload any question ("closed question") or dilemma to the digital space or search the Platform's Q&A and receive immediate answers through the wisdom of crowds.

Companies and businesses

Developing a new product? Do you wish to know what you customers think or need? With Askapedia you can upload surveys or research questions and receive objective answers quickly and at low cost from other Internet surfers.

The Platform's advanced tools enable performing cross-reference of data drawn from surfers, and achieving valuable Big Data database, which can serve companies and businesses to carry out accurate marketing campaigns and publications.

We intend making Askapedia the world's leading wisdom of crowds platform. Provide an advanced Big Data database to companies and businesses with minimum investment and time.

The portal will form a quick and cost-effective alternative to research and survey institutes, by asking questions and enabling broad exposure to numerous users over the Internet.

<https://www.askapedia.co.il/home>

Biot- Med

bio-T™ is driving healthcare innovators to join the IoMT (Internet of Medical Things) revolution by accelerating their way to introduce smart connected regulated solutions while enjoying dramatic reduction of cyber security and other risks.

Designed to provide complete flexibility and data ownership, the bio-T™ cloud platform allows quick and affordable end to end device-cloud-mobile app connectivity, and healthcare-related functions, including adherence management, remote patient recovery management, regulation compliance (US FDA & HIPAA, EU ISO & GDPR), and V&V protocols.

Cardiovascular implants, laser-based surgery devices, orthopaedics, gynaecology are just a few domains where bio-T is the chosen solution for lifechanging impacts today.

<https://www.biot-med.com>

bio-T
Powering the IoMT Revolution

Blitz

The world's urban population is tripling, demand for home delivery is increasing and its associated impact on air pollution intensifies.

BLITZ is tackling these challenges to become the leader in smart transportation solutions.

Founded in 2012 by Raphael Moszynski and a group of engineers, BLITZ has created an easier, cleaner and more cost-efficient 100% electric two-wheel vehicle. Enabling the last mile industry to grasp the potential of smart transportation.

BLITZ electric scooters are designed at its research and development centre in Tel Aviv, where innovative battery technology and robust design are paired to create the ultimate emission free electric scooter. Combining our Battery Management System to ensure a balanced and optimal energy capacity, with BrushLess Direct Current engines which boast a magnificent 91.5% electric energy to mechanical energy conversion efficiency ratio. BLITZ supports your smart transport needs with a full-service solution, including a 24/7 customer service centre on hand to support in the operations, insurance, branding & maintenance of your fleet.

It is our mission to transform the urban center, in Israel and beyond, into a smart city. We are proud to have started that journey with over 20 million BLITZ driven kilometres for both private consumers and corporations leading last mile delivery - including Domino's Pizza, McDonalds, Pizza Hut and Post Office - saving our riders more than 50% in overall costs. And this is just the start of the ride.

electricride

Bzigo

Bzigo is the first ever device that actively detects and locates mosquitoes. Once a mosquito is detected, you receive a notification to your smartphone, and a laser marker shows the mosquito's precise location, allowing you to easily eliminate it. Bzigo's technology will be used to eliminate pests for industrial purposes, such as in greenhouses and dairy farms.

Bzigo - Autonomous devices for a pest-free life.

<https://bzigo.com>

Canias

Would you like to watch your company work smoothly, complete tasks on time, and share information simply and securely? Spend your valuable time growing and improving your company. CANIAS is one of only a few real-time business management systems in the world based on cloud technology. It will optimise and speed up processes in your company, and the data it collects and processes will help you make the most profitable strategic decisions possible. Collect, modify and optimise your processes with the convenient and flexible CANIAS business management system.

OPEN SOURCE SYSTEM

With our unique technology, architecture and development environment, the TROIA code management tool gives clients direct access to the program's code. Therefore, companies with CANIAS software can adapt flexibly and efficiently and continue to develop their existing solutions.

Codequest

codequest delivers successful products to startups and SMBs.

What differentiates us from other software agencies is not only our experience but also the emphasis we put on the quality of our work. We make sure that every line of code we deliver is robust, secure and easily maintainable.

We've built a whole product dedicated to code quality; codebeat.co. codebeat is an automated code review tool for web and mobile applications. Its customers are companies and open source developers from all around the world.

The company was founded by Tomek Korzeniowski (CEO) after Apple bought the startup he was a part of.

Due to our experience with in-house projects and business ventures, we are a perfect match for organizations in need of a technological partner who understands all aspects of running scalable software products.

codequest

Devrain- Chatty

Our mission is to help companies to hire the best talents, and to help job seekers constantly improve their skills to be able to find a job of their dream. Existing recruiting models are time and cost-consuming. An automated interview process offers the possibility to reduce the admin costs associated with preliminary interviews. Indeed, structured interviews increase accuracy, reduce unconscious bias, and improve workplace diversity. Only a few companies have a straightforward onboarding process. This might be a reason for a bad first-impression of newcomers and additional costs for companies.

Each employee should have a learning path which should help to achieve their goals. It's an essential component of company success. Individual learning paths modeled by artificial intelligence can significantly improve the learning process.

Chatty's vision is to create a conversational AI platform for recruiting, interviewing, onboarding, and learning processes automation.

<https://chatty.ai/identity/login?ReturnUrl=%2F>

Chatty

Ecycli

Ecycli developed a lightweight portable detachable unit that converts a regular bike into an E-bike, for in-city commuters. E-bikes are subject to theft during parking, thus, commuters avoid using E-bikes on a daily urban journey. The use of Ecycli detachable power unit allows commuters to park anywhere, and carry the power unit with them.

<http://www.ecycli.com>

All-in-one remarketing app... packed full of innovative features.

It's an automated omnichannel solution, designed to help drive online sales with cleverly-timed web push, E-mail, SMS and Messenger notifications. It includes several easy-to-use, powerful features to help you attract first-time customers and extract more value from the ones you've already got.

GradTrain

AI matching platform for higher education with users from over 150 countries.

<https://www.gradtrain.com>

Ideamotive

Ideamotive is an agile software development agency in Europe. The platform enables managers and startup founders to scale their tech teams by leveraging highly skilled talent from Central and Eastern Europe. Ideamotive Platform is a Product Team as a Service (PTaaS) solution.

The platform includes:

- growing talent database (currently based on signed agreements with mid-sized European software consulting companies - e.g., from Poland and Ukraine),
- project briefing, predefined team templates with timelines of example projects (helpful for non-tech and first-time founders)
- AI-powered recommendation algorithm *
- simple billing and invoicing, *)

The recommendation solution divides each talent by skill level in technologies (e.g., iOS, Java, senior, AWS), previous industry experience (e.g., FinTech, Travel), similar projects (SaaS, mobile, landing page, video streaming, cloud), location/timezone, language skills, nationality, hourly rate, availability, etc. We also tokenize projects, and basing on this data algorithm will recommend the best fitting team for given project requirements.

LEADERS

LEADERS - Your influencer marketing technology partner

Fuse AI with big data and smart algorithms to put your influencers marketing activities on autopilot!

LEADERS is here to shift agencies' direction, transforming their organization into a tech-driven powerhouse with the competitive edge they need to scale without limits!

Influencer marketing is the fastest-growing segment of online marketing with over \$2 billion spent in the industry just last year.

Although many investments have been made into self-service influencer marketing technologies aimed at cutting out the role of agencies, 80% of the industry is still managed by influencer and PR agencies. Here at LEADERS, we believe this trend will stick.

However, the main challenges for many of these agencies are that they are still working the old fashioned way, with manual-entry excel sheets and emails, no standardization in terms of KPIs, causing confusion among clients and the possibility of fraud with fake followers. Finally, activating a large number of influencers requires a costly amount of time and manpower.

LEADERS streamlines this process so that agencies have all their influencer needs in one place. Hence, we've created a unique solution to execute influencer marketing campaigns from start to finish, answering all the market needs – including planning and pre-campaign KPIs calculator, influencer discovery, execution, client analytical dashboards updated in real-time, a talent agency platform, and an influencer app – all focused on delivering maximum communication between all parties.

MyLivia

Meet Livia – the off switch for menstrual pain.

Livia, iPulse Media's flagship product, is a breakthrough wearable menstrual pain relief device. Its patented technology is helping women across the globe overcome menstrual pain more effectively, quickly and safely than drugs. Using electric micro-pulses to tap into the body's natural pain defenses, Livia prevents menstrual pain from being felt. Unlike pain medications, there are no side-effects to using Livia, and the female body cannot build up a tolerance to it. Livia is portable, fashion-forward, easy to use and can be worn discreetly under most outfits. Moreover, its long-life rechargeable battery makes Livia reusable for years.

To learn more about Livia, watch here.

iPulse Medical is an Israeli developer and marketer of innovative femtech products, that was founded in 2015 by tech entrepreneur Chen Nachum.

PAI Tech

PAI-TECH makes computers smarter through the power of intelligent bots, PAI-BOTS. We have created the world's first bot operating system standard, PAI-BOSS, an all-inclusive distributed solution that enables you to improve efficiency, save costs as well as increase security. PAI-BOSS is cross-platform & cross-device and provides a universal & intelligent interface to easily adopt new technologies like AI, Blockchain, and IoT.

With PAI-BOSS you are able to:

- Develop: Create your own distributed applications (d'apps) using intelligent bots
- Manage: Use PAI-BOTS to gain full control over your hardware and systems
- Analyze: Run AI algorithms in real-time, on any data, using a distributed network of bots
- Trade: Buy and sell your PAI-BOTS, bot upgrades, algorithms, and data

PAI-BENEFITS – What PAI-BOSS can do for you:

- Accessible Solution: Our PAI-BOTS are more accessible and easier to use than existing terminals and interfaces.
- Distributed Network: Using a distributed network will improve your overall software performance and speed.
- Reduce Costs: PAI-BOSS enables you to lower your costs by up to 65%.
- Upcycling Existing Hardware: Don't throw away your old hardware – Install a PAI-BOT on your old device and access its computing power through a distributed network.
- Scalable Solution: PAI-BOTS are interconnected which enables you to easily scale your services and processes.
- Full Control: Using our PAI-CODE protocol, you have full control over all your PAI-BOTS.

Pragmasoft

We provide Infrasenses solution - AI based real time space tracking tool, dedicated to human behaviour and space usage detection. It consists of hardware (IoT device with thermal sensor) and software components including neural network. Infrasenses delivers detailed real time space insights, enabling its full understanding and experimentation in terms of office space utilisation. Machine learning, computer vision, predictive analytics are our domains. Based on that we also deliver our agile managed services by fueling our clients with most talented engineers to solve their software dilemmas.

The Galilee Accelerator

The Galilee Accelerator is a program dedicated to Israeli early-stage startups, developing solutions and business models that can transform the manufacturing sector.

We're focusing on startups that target manufacturers as customers, taking part in the big wave of innovation in factories called Industry 4.0. Some other relevant names are IIoT – Industrial Internet of Things, Advanced Manufacturing and Smart Factory.

This includes innovations in manufacturing, maintenance, factories' management, logistics and more, using advanced technologies.

We've established a network of entrepreneurs and a network of industrial and tech companies, Israeli and multi-national, to help our entrepreneurs succeed while benefiting from innovative solutions and top-notch startups engagement.

Entrepreneurs and mentors are taking part in our program from all over Israel. We take no equity nor IP rights from our start-ups. Our services are provided free of charge.

The Galil Accelerator is taking its startups to their next level!

The program is managed by Ort Braude Academic Engineering College Karmiel, Moona – A Space for Change, and the Karmiel Municipality, and Misgav Regional Council cooperating with industrial companies – Israeli and multi-national ones. The Accelerator is supported by the Israeli government – The Ministry of Economy and Industry, Maof-Tech.

Wearble Device

Wearable Devices develops an AI-based wearable which decodes the neural activity of the nervous system - an API for the Brain. The Mudra device, available at www.getmudra.com, identifies subtle finger movements and translates them to gesture interactions with AR/VR, smartwatch, Mobile, and any digital device. When the user moves his fingers, the sensors detect biometric signals (a.k.a. "Action Potential") and Deep learning algorithms translate the signal pattern to user-intended finger movement.

Each gesture is bind with a control function - moving the Index finger to navigate right, Thumb finger to move left, tap the Middle finger with the thumb to select. Gradational fingertip pressure is used to hold, drag, drop and rotate items. The device offers hands free interaction and creating real-life immersive experiences without clenching fingers on hand-held controllers or using un-natural hand movements for gesture cameras, with visible display, indoors and outdoors, with no external setup.

BigID

BigID aims to transform how enterprise protect and manage the privacy of personal data. Organizations are facing record breaches of personal information and proliferating global privacy regulations like the EU GDPR with fines reaching 4% of annual revenue.

Today enterprises lack dedicated purpose built technology to help them track and govern their customer data at scale. By bringing data science to data privacy, BigID aims to give enterprises the software to safeguard and steward the most important asset organizations manage: their customer data.

BigID has offices in the US and Israel and is founded by security industry veterans spanning the identity, data security, big data and governance markets.

Bilance

Bilance is a Long-Term Flexible Solutions platform in the Future of Work. We help companies managing their workloads by “Sharing Expertise” of their employees across companies. Bilance is a location-based platform for companies. Bilance provides businesses services physically at your office or remotely.

B2Bilance ->> Business to Business

Our significant solution is “Experts Sharing” between companies. Your employee can provide some time and work for other companies. It will be a mutual benefit for everyone. You, the employer, will be able to manage your workloads and the employees will experience diversity and interest.

Black Snow

BLACK SNOW is Augmented Reality platform for building open world large scale cinematic games as well as gamificated applications for advertisement and map interaction.

The innovative technology enables for all-time seamless merger of physical and digital worlds on handhelds. Virtual objects like airplanes or spaceships are rendered in AR at their real geo positions, light conditions, distance and height. No third party hardware needed.

The platform comprises realtime multiplayer, first person shooting, real time strategy and card collection mechanics that can be repurposed for any skin or IP content set.

BLACK SNOW is also the name of the game, which demonstrates the platform capabilities. Watch the trailer here.

Nothing like this exists on market yet - the game renders a Hollywood sci-fi alien invasion blockbuster around you. It immerses players into the aerial fleet vs. fleet duels with a first person shooter feeling. It is both single and multiplayer, eSports enabled - MOBA-style PvP. The battlefield is the real world area of 2 miles around the player.

www.blacksnow.tv

Code & Pepper

Team augmentation and end-to-end software development services for FinTech companies. Code & Pepper key clients have been invested by J.P. Morgan, Barclays, and Thomson Reuters.

<https://codeandpepper.com>

ConTech

The goal of ConTech is turning Israel into an international leader and attractor-point in the construction-tech sector in the spirit of the 'startup nation', using the latest innovation and technologies.

As a part of the program framework, we have built and maintained an eco-system of startups and a variety of collaborators and companies consisting of: Contractors, developers, corporate enterprises, regulatory bodies, policy makers and investors.

Through our expanding eco-system, new collaborations are being made on a regular basis, maximizing the potential of cross-border business collaborations on an international and local scale.

Our network assists of young ventures seeking early stage funding from setting up the initial infrastructure all the way to receiving their investment.

ConTech's vast network activity has significantly contributed to increasing investments in the field, attracting key players in the global market to discover new opportunities in the growing Israeli construction-tech sector.

ConTech has also helped raise public and government awareness for the field through cooperations with municipal legislators, authorities and policy makers. As a result, new programs, accelerators and public funding programs, many of which are done together with international corporates, have raised dramatically in recent years, turning Israel into a global hot-spot for new construction tech startups.

Over the last two and a half years, ConTech has also brought together numerous international delegations to discover the latest startups and technologies in the Israeli 'Silicone Wadi'.

DSR S.A.

DSR since 2005 effectively supports the use of the manufacturing company's resources, by the assessment of real usage of machinery and work time of the specialists using IoT tools and cloud computing. Moreover, our solutions allow for the improvement of production processes providing actual image of the production key performance indicators. The production management systems we offer, also allow for fast analysis of the resources availability and better organization of labor as well as for efficient scheduling and production planning.

Our production management system developed for Industry 4.0 called DSR 4FACTORY - is a package of IT solutions for improvement of the specific areas within the whole production process, which includes services and software for registration and analysis of the production process, monitoring of specific machine parameters and material flow tracking:

SFC 4FACTORY - Shop Floor Control - best solution for more effective production thanks to analyzing and controlling real time data from the manufacturing shop floor. With this cloud services, it is known what is happening in individual production processes. All orders are monitored and collected in real time in the system's database, for later reporting and analysis. Data collected by the system regarding various KPIs inform about the progress of work on individual orders, the effectiveness of work of people, machines and devices.

EAM 4FACTORY - Enterprise Asset Management software for overall production plant maintenance to help optimize production through complete preventative and predictive maintenance capabilities. Full functionality allowing for efficient management of the company's assets. Handling of events related to machinery and equipment reported by the production department, as well as repair orders allowing registration of machinery working time, reservation and release of parts and consumables from the warehouse.

IOT 4FACTORY - using SFC 4FACTORY or EAM 4FACTORY is highly recommended to collect data directly from production units. This solution uses hardware which integrates with existing units and gather data in the real-time. In order to register production data from manufacturing shop floor in automatic way IOT 4FACTORY module is indispensable. Then all production units can be examined using KPI tool according to ISO 22400 and causes of effectiveness losses can be verified. This solution is also an integral part of the predictive maintenance. Using it manufacturing company can schedule asset maintenance in advance before expensive failure occurs.

CFG 4FACTORY - allows manufacturers to configure products of any level of complexity. Application enables fast and correct execution of individual orders based on options and variants available in a given model. It is a complete, integrated IT solution supporting the production of custom-made products. Based on the prepared rules and information provided by the user via the questionnaire, the CFG 4FACTORY application generates a complete bill of material (BOM) and complete routings which are used by the any ERP system.

MPS 4FACTORY - Master Production Schedule is a software that supports manufacturing companies in creating a long-term and short-term production plan as a dynamic and digital production plan, with generation of production orders. MPS 4FACTORY is a tool that shows all necessary data that will help to plan production, load of machines and raw material demand in the next days and longer time perspective.

Telemessage

TeleMessage Mobile Archiver captures and records: WhatsApp chats, SMS, MMS and Voice calls of employees; allowing enterprises to comply with regulations such as FINRA, SEC, MiFID II, Public Record and others.

Our mobile archiving solution set support corporate and BYOD phones, and consists of:

- Enterprise Number Archiver - Provides employees with a business number associated with an App on their phone. All business communication is archived.
- Android Archiver – A lightweight agent runs in the background and records all messages and calls, uploads them to be archived.
- WhatsApp Archiver - Identical to regular WhatsApp, while capturing all WhatsApp chats, files and attachments and uploading them to be archived.
- Network Archiver - Integrated with mobile carrier networks to get a copy of messages and calls directly from the operator network side and archive them.

All mobile messages are archived with full mobile message metadata, employee details and ready for eDiscovery, in any compliance and governance platform.

TeleMessage complements the Mobile Archiver with our Mass Messaging and Secure Enterprise Messaging product lines.

OpenLM

OpenLM is a leading provider of software license management solutions for engineering software applications. Founded in 2007, the company has established a global install base of more than 1000 customers which includes many of the world's largest corporations in the Fortune Global 500.

OpenLM is an enterprise software system that monitor and manage the use of licensed software products. OpenLM allows the organization to optimize usage, forecast software licensing requirements and maintain an effective ratio of licenses to users. The software can be deployed on the organizational network or used in a secured cloud implementation.

The core product, OpenLM for Engineering Licensing, lets you monitor the consumption of software licenses being used in the organization. It comes

It supports more than 30 leading industry license managers and covers almost any high end engineering software such as Autodesk, Matlab, Catia and many others. OpenLM connects to all your organizational directory and allows you to distribute costs and allocate licenses based on your organizational structures. It can be downloaded from our website and typically installed and configured without the need for professional services. Furthermore, we provide full, unlimited support, including telephone support, during the 30-day free trial period.

OpenLM has support centers worldwide and provides 24/6 response by chat, email or phone. Support is provided in multiple languages such as: English, German, Korean, Japanese, French, Russian and more.

Green Parrot

Green Parrot is a digital product development and marketing company. We help companies to design and develop their digital products and market them successfully. We're also developing our own products and ventures.

At DLD Tel Aviv we're presenting two projects:

Finderstand.com

Thanks to NLP technology we create automated consultants for financial services companies, that contain all the knowledge of the organization and provide access to that knowledge by conversation.

Develtio

At Develtio we redefine software production through agile IT talent management and quantitative approach to scoping projects. We help companies to create great apps fast and on a fair budget.

Develtio works with a pool of 70 best software developers from Poland. True experts in their specific fields. Thanks to our proprietary algorithm for teams creation, we choose the best of them for a given project in order to deliver it on the best possible quality and blazing speed. This top talent is supported by our inHouse developers and experienced product managers.

<https://greenparrot.pl/>

inFullMobile

inFullMobile is a product design and development agency. We specialize in consumer brands at the intersection of physical and digital. inFullMobile has helped companies large and small turn their ideas into engaging products.

With over 10 years of experience, the inFullMobile team offers clients the confidence needed in creating not just a great product, but the supporting services to deliver a seamless user experience. From the first sketch, through prototyping and testing, product engineering, brand development, and manufacturing, our team will be there with you through the entire process.

From humble beginnings, inFullMobile has grown into a technology agnostic, internationally renowned powerhouse studio—having delivered over one hundred projects across industries and verticals. From payment terminals and POS systems, networked audio devices, voice integrations, enterprise platforms, AI and machine learning systems, cookbook apps, IoT / connected devices and much more—riding the cutting edge of technology to achieve the goals of our clients, and their clients.

Our.guide

Our.Guide is an application dedicated to hotel websites. It provides personalized travel guide which allows its users to explore the surrounding places near the hotel. It also constitutes a facilitation of trip organisation.

The widget offers numerous functions and features. Hotel guests have a constant access to the most substantial information thanks to an abundant database which gives an opportunity for planning the stay.

Our.Guide application is also destined for hotel authorities – they gain an essential knowledge associated with guests' expectations and preferences. Thanks to daily and monthly reports hoteliers have a chance to find out which tourist attractions and local events are the most appealing, and – what is more – which Trip Plans are the most frequently used by your guests. At a glance, the foregoing aspects lead directly to considerable increase not only in profitability or marketing but also the overall efficiency in the hotel industry.

In addition, hotel owners take advantage of Our.Guide content in order inspire their potential clients during the process of purchasing, as well as influence their pre-departure preparations.

Our.Guide application works on the principle of simple interface – after installation on

the website, each user has an immediate insight into target sections, such as Tourist

Attractions in the area (divided into separate categories: Art & Culture, Entertainment, Landscape, Sport, Restaurants, Shops, Gay Friendly, For Kids, Accessible), Events (constantly updated), Trip Planning Tool or Dashboard for a manager.

The company offers various pricing plans for using Our.Guide application – MINI,

STANDARD or PREMIUM. The prices are diversified depending on the range of the included functions.

CargUp

CargUp® is a cloud platform which allows shippers, transport companies and logistics companies to upgrade from the analogical era to the digital era. CargUp® consists of a web platform and a native app (Android and iOS) through which is possible to get perfect match between the shipper (a company that needs to send goods via road) and the carrier (which is available for the shipping request).

How does it work?

The shipper creates its shipping request in a few seconds, specifying all the information regarding goods, pick-up and unloading areas and prices. The request is sent to our highly qualified and trusted network, which is compatible with the needs of the user. In just a few minutes, the shipper found the perfect carrier for the shipment, unlocking all the exclusive features of CargUp (document dematerialization, geolocalization of the goods, real-time messaging, analytics, calendar, proof of delivery etc.). Alternatively, the company can send the shipping request to all its usual carriers, having still available all the post-matching features. CargUp® operates in partnership with freight forwarders and transport brokers and it makes their work easier, quicker, transparent and more profitable through an exclusive and unique multi-level tender system.

ITA - Italian Trade Agency

Hibye

Hibye is a local network that connects people with shared interests and needs through in person activities. Hibye allows users to spot other people around and to have a real-time interaction: from sharing a drink or a taxi ride to finding a business partner during a conference or a fair. We got 418k in funding so far from FFF, Crowdfunding and a Venture Capitalist. Hibye Beta version was released in July 2017, last version a few weeks ago. Almost 25000 users have downloaded our app. Hibye Drops, an innovative concept of Stories, is our main feature, potentially disruptive.

Hibye is a free service for people but not for commercial accounts who will pay: A Standard fee to get the corporate profile; A Premium fee for targeted promotions; A Variable fee to get extra visibility on the platform

Our team is composed by a CEO, a CTO, a developer, a marketing analyst and 2 corporate advisors

In the futures human relationships are going to change in new and different ways. We are getting into the Internet of People (IoP) era and into the People as a Service (PeaaS) business.

Ono exponential farming

ONO EXPONENTIAL FARMING is the game changer start-up in the Agritech industry. The Company has developed the first "Seed-to-Pack" platform based on a patented concept for hydroponic cultivation where a new class of farmers can cultivate practically everything, everywhere.

A highly automated secure system for indoor vertical cultivation under human control, helped by increasingly refined AI algorithms and Biotech innovations in a world wide distributed ecosystem. ONO has created a fully traceable "better than organic" farming opportunity according to a "circular economy" system that eliminates waste and pollution, which makes better use of water availability and uses alternative energy sources for its operations. Helped by increasingly refined AI algorithms and Biotech innovations in a scalable worldwide-distributed ecosystem and compared to existing vertical farms, ONO reduces investment risks: 1) 3x more efficient in space allocation applying lean principles 2) wide variety of applicable horticultural species 3) -30% CAPEX 4) -70% LED consumption 5) -80% labour cost.

ONO collects data from each plant and elaborates and shares increasingly better cultivation parameters to any associate without on-site competences.

ONO lets any facility be the right one due to its insulated structure.

Peekaboo

Peekaboo is one of the leading open innovation communities in Italy. Founded in 2015 to spread the entrepreneurial culture of startups among university students, Peekaboo is recognized for having launched the Lean Startup Program, the main pre-acceleration program in Italy to validate and implement a business idea in team in just 2 months thanks to Lean Startup Methodology. Thanks to this program, in less than 4 years Peekaboo has accompanied the growth of more than 50 startups operating in different industries (from mobile payment to fast prototyping, from VR to E-Health), has trained hundreds of digital entrepreneurs and has supported the deal flow of national company incubators. Since 2017, several large companies in the energy, pharma and GDO sectors have chosen Peekaboo to connect with the startup ecosystem, discover its talents and technologies, and validate their business challenges in outsourcing. For this reason Peekaboo has developed an Open Innovation framework that allows partners to analyze the startups operating in their industry, discover the opportunities offered by technology, observe the development of MVPs that complement their portfolio and maintain their competitive advantage by developing new business lines. Peekaboo's vision is to boost the Italian youth economy by connecting the potential of startups with the pain of corporates.

Pigro

Creating a chatbot today means doing a long, complex and manual process. A company which wants to create a chatbot have to identify all the possible questions user can ask, create bot-specific QnA reworking company's knowledge, insert them manually in the selected platform, and then do the training of the AI by inserting questions' variants and test and correct the behaviour of the AI. Automating this process sounds impossible, no?

Impossible.bot lets everyone create a chatbot faster as never before, we like to say that is the Usain Bo(l)t of chatbots platforms ;)

Our chatbots read existing company Help Content and learn by themselves, they are able to understand user's questions with both natural expressions and business jargon.

We use your Help Content knowledge base as it is, minimizing your effort for adapting your content to be used by our artificial intelligence. The setup process of impossible.bot takes less than 10 minutes on the average, compared to 6 months of other platforms.

We currently support: Zendesk Guide, Intercom, and FAQ; we are working on HelpScout, Front, Salesforce, Freshdesk, Zoho, Kayako, Groove, and HappyFox.

ITA - Italian Trade Agency

Revotree

Revotree integrates easy-to-install soil probes, weather stations and solenoid valves thanks to a platform capable of managing the devices and the farm operations. The platform allows the real-time data analysis, the sharing of the best practices and the actuation of the watering system, to obtain a natural and economic resource saving, important for farms of every dimension.

The farms using Revotree save up to 50% of water and a lot of time in operations, increasing the productivity of their crops.

The Hive

THE HIVE is a Business Incubator & Accelerator certified by the Italian Ministry of Economic Development, under the Italian Law as per paragraph 5 of Article 25, of the D.L. n. 179/2012, converted into Law no. 221/2012.

THE HIVE is a project of international scope that aims to promote economic development and job creation by integrating talents, technologies, know-how and capital within a network that promotes the growth of new businesses.

THE HIVE helps entrepreneurs and professionals to start, revitalize, quickly and successfully grow their business, by integrating excellence and passion of entrepreneurs, professionals, startappers.

THE HIVE, creates a dynamic and interactive environment in which various professionals can work together for the growth of their business through the development of relationships, expertise and innovation.

THE HIVE promotes a new entrepreneurial culture based on ethical behavior, social responsibility and environmental principles at the basis of a sustainable and long-lasting success of any business and profession.

Mosaico Digitale

Since October 2008, the Pepe & Con Srl, with the futuristic Mosaico Digitale project®, has brought to the fore the ancient art of mosaic, revolutionizing the creative perspectives. This unique product has been designed and produced in Italy with the latest technology to deconstruct any digital image and print it onto bio-based resin film tiles. Mosaico Digitale's most impressive feature is that almost all aspects of the tile are completely customizable; from features image and shape to texture and install surface. Mosaico Digitale's most impressive feature is that almost all aspects of the tile are completely customizable. Mosaico Digitale's innovative system takes advantage of modern printing technology to customize and construct tiles digitally – printing entire images and setting them behind a resin which forms a tile. Any photo or graphic image of your choosing may be transferred onto the resin tiles, even the shape of the tiles themselves can be changed to fit any project you have in mind. The install process is also intelligently simple; Each tile square is numbered individually during production, allowing the tiles to be laid out in numerical order to form the whole image in preparation for tiling. The flexible nature of the tile sheets allows them to be applied to irregular surfaces including curved or round objects as well as be trimmed to fit into unusual wall or floor spaces. For the first time digital images can be tiled across anything from floor spaces and swimming pools to furniture and feature walls. Thanks to these particular characteristics, over the years, Mosaico Digitale® has received acclaim around the world so as to provide reality as Eataly, Versace, Costa Group, Metropolitan Chicago, MacDonaldis, and collaborate with renowned architects and designers such as Mac Stopa and Karim Rashid. Mosaico Digitale®: the only limit is your creativity!
