

# WORLD GREEN BUILDING WEEK 2019

**23–29 Sept**

## Building Life

This World Green Building Week, we're **#BuildingLife** and exploring how we can create a green, healthy and climate resilient built environment for all.

**Produce**  
**Design**  
**Build**  
**Use**  
**Deconstruct**  
**Reuse**

Join your local Green Building Council  
and help us build a better future.

**#BuildingLife #WGBW2019**

The graphic features a large orange circle in the top left corner, set against a background of various shades of green and yellow geometric shapes. A yellow horizontal band runs across the middle. Below this, a stylized yellow and dark blue object, possibly a light fixture or a piece of machinery, is depicted. The bottom section includes a blue horizontal band with two circular icons, each containing a white and dark blue circle.

# WORLD GREEN BUILDING WEEK 2019

**23–29 Sept**

## Produce

**Green materials and products are sourced responsibly, release fewer emissions during production, and can improve health and wellbeing for building occupants.**

This World Green Building Week, we're **#BuildingLife** and exploring how we can create a green, healthy and climate resilient built environment for all.

BUILDING  
WEEK** 2019

**23–29 Sept**

## **Design**

**Design with sustainability in mind to enhance resource efficiency and deliver long-term energy savings, reducing harmful emissions and protect our environment.**

This World Green Building Week, we're **#BuildingLife** and exploring how we can create a green, healthy and climate resilient built environment for all.

GREEN  
BUILDING  
WEEK 2019**

**23–29 Sept**

## **Build**

**The environmental impact of our buildings is affected by the choices we make: how we construct, where we source materials from, and how we transport them.**

This World Green Building Week, we're **#BuildingLife** and exploring how we can create a green, healthy and climate resilient built environment for all.

**#BuildingLife #WGBW2019**

A stylized graphic of a hand with fingers pointing upwards, holding a large orange sun. The hand is composed of geometric shapes in shades of green, yellow, and dark blue. The background is a light grey with a white triangle in the top left corner.

# WORLD GREEN BUILDING WEEK 2019

**23–29 Sept**

## Use

**Green buildings help us use less energy and water and create minimal waste. Maintaining our green buildings can ensure they are healthy and perform optimally, extending building life.**

This World Green Building Week, we're **#BuildingLife** and exploring how we can create a green, healthy and climate resilient built environment for all.

**#BuildingLife #WGBW2019**

A graphic for World Green Building Week 2019. It features a large orange circle representing the sun in the top left corner. Below it, a dark blue silhouette of a building with four arched windows is positioned in the center. The background is composed of various geometric shapes in shades of teal, green, and yellow, creating a modern, abstract architectural feel.

GREEN  
BUILDING  
WEEK** 2019

**23–29 Sept**

# Deconstruct

**At the end of its useful life,  
carefully deconstruct your  
green building to ensure as  
many parts of it can build life  
again, reducing the need for  
new resources.**

This World Green Building Week, we're **#BuildingLife** and exploring how we can create a green, healthy and climate resilient built environment for all.

**Join your local Green Building Council  
and help us build a better future.

**WORLD  
GREEN  
BUILDING  
WEEK 2019**

**23–29 Sept**

## **Reuse**

**Maximise the refurbishment of existing buildings; reuse and recycle materials to close the loop and build life again, saving precious resources.**

This World Green Building Week, we're **#BuildingLife** and exploring how we can create a green, healthy and climate resilient built environment for all.
